margin of ten feet to be kept uncultivated below the bunds of tanks, it was represented at the meeting of the Representative Assembly held in 1897 that the jodi on inam lands should be reduced in proportion to the extent taken up and reserved by Government, and thereupon the opinions of the Deputy Commissioners of districts and the Superintendent of Inam Settlements were called for on the subject. The Deputy Commissioners of Bangalore, Tumkur and Mysore report that in their districts there have been no cases of inam lands acquired and reserved under the aforesaid rules, while the Deputy Commissioners of Kolar, Hassan and Shimoga do not explicitly say whether there were any cases of the kind in their districts. The Deputy Commissioner of Kadur states that there are about 187 cases of such reservation in his district, that in 43 cases the proportionate survey assessment has been deducted from the jodi amount, and that in other cases no proportionate jodi has yet been deducted. In the Chitaldrug district, there are about 40 such cases of reservation. All the Deputy Commissioners are unanimously of opinion that proportionate jodi may be deducted on the extent of the inam land taken up and reserved, as prayed for by the members of the Representative Assembly. The Superintendent of Inam Settlements states that the best way of dealing with such inam lands is, to pay money compensation for them and that the other alternative is the proportionate reduction of jodi to which the persons concerned are entitled.

2. The point for decision is how the jodidars should be compensated for the loss of their lands taken up for reservation of the prescribed margin below tank bunds. For the loss of land the jodidar, if he is himself the occupant, or the occupant, if he be other than the jodidar, is entitled to money compensation and the jodidar is in addition entitled to a proportionate reduction of the jodi amount.

Government Proceedings No. 7601-615—R. F. 46-97-98, dated 24th April 1899, issuing instructions regarding the collection of the Statistics of Agricultural Stock in Mysore, and the preparation of the Khaneshumari account.

No. 8119-28—R. F. 46-97, DATED BANGALORE, 11TH APRIL 1901.

ORDER THEREON—It has recently come to the notice of Government that since the date of the Order read above, a diversity of practice has sprung up as regards the preparation of the Khaneshumari account, village form No. 11. In some taluks, the registers are written annually as before; in some only the changes are noted, while in others they are not written at all. This is not as it should be. The Khaneshumari account is intended to show particulars not only of agricultural stock but also of population and other details as indicated by the several headings prescribed. The Order of Government, dated 24th April 1899, relates exclusively to the collection of statistics of agricultural stock with a view to obtain correct figures of which a methodical enumeration, once in five years, was ordered. The writing up of the village form from year to year was never intended to be dispensed with altogether. On the other hand, para 26 of the order requires that the account of agricultural stock *should run for the entire quinquennium and be liable to further scrutiny by Jamabandi Officers.* In other words, the statistics of agricultural stock must be repeated annually until the next enumeration takes place, and the whole account as regards other particulars must be properly prepared and scrutinized every year. No time should therefore be lost in getting the account written up completely where it is found that it is either not prepared at all or written up imperfectly. It is hoped that Deputy Commissioners will issue early and suitable instructions in the matter.

(4) Letter No. 2373—436, dated the 14th January 1901, from the Conservator of Forests in Mysore.

No. 8395-404—R. 2960, DATED BANGALORE, 17TH APRIL 1901.

ORDER THEREON—In the Bangalore district, there are no iron furnaces worked on a large scale, and petty furnaces are taxed at Rs. 2 each, the amount being credited under "Mohatarfa." In the Kolar district, there are only a few furnaces taxed at rates varying from Rs. 3 to 9 and the item is credited to "Forest." In the Tumkur district, where there are not many such furnaces, the rates range between Rs. 16 and 30 and the collections are credited to "Forest." There are no iron furnaces in the Mysore and Hassan districts. In the Shimoga and Kadur districts, the rate is the same, *viz.*, Rs. 12, for each furnace, and the collections are credited to "Forest." In the Chitaldrug district, where extensive trade is carried on in steel, the rate of tax has been reduced to Rs. 12 as per Government Proceedings No. 1644—R. 546, dated 22nd August 1899, and the collections are being credited to "Forest."

2. The question for decision being whether the tax on Koolmes should be credited under "Forest" or under "Mohatarfa," the Conservator of Forests was consulted as to whether it should not be credited to "Mohatarfa," when the Koolmes are not located in or near forests and are not worked with fuel taken therefrom, but are worked at villages outside forest limits and a tax is levied from the smelters. The Conservator is of opinion that whether or not "Koolmes" are located in or near forests, the great proportion of the forest produce consumed, *viz.*, iron ores, wood and charcoal, is obtained from Government forests, that the Mohatarfa tax paid by the smelters, often or usually represents a mere fraction of the value of the ore and fuel consumed, that the great damage done in certain forests by iron smelters is notorious, and that the tax which, when considered as price paid for fuel consumed, is extremely low, cannot be an adequate compensation for such damage. He suggests that pending revision of the Forest Rules, the tax, if intended as a payment for forest produce consumed, may be uniformly credited to "Forest," although there may be instances in which the Mohatarfa paying iron-smelters obtain their ore and fuel from other than Government lands.

3. The point whether the tax collected on "Koolmes" according to mamul, is on account of the trade carried on by iron-smelters, and iron-smiths, or on account of the materials removed by them from Government forests, as supposed by the Conservator of Forests, must first be disposed of. Under the existing Forest Rules, *Mohatarfa-paying* iron-smelters and iron-smiths are allowed to remove from District Forests firewood and charcoal free of seigniorage for their own *bona fide* private use. Thus, the Rules presuppose the payment of Mohatarfa by iron-smelters and iron-smiths, which is levied on account of the trade carried on by them. Further, as regards petty Koolmes, it is laid down in Government Proceedings No. 4605-12—L. 565, dated 11th June 1892, that when blacksmiths carry on extensive trade and have a place of business where they sell the articles they make, they are liable to Mohatarfa shop tax, but if they merely work for wages, they are not liable to it. Under these circumstances, the Government direct that this item of revenue, which does not belong to the Forest Department, be credited under "Mohatarfa" instead of under "Forest," as hitherto.

The following papers containing proposals for the introduction of Survey Settlement into the Sringeri Jahgir situated in the Koppa taluk of the Kadur district.

*(1) Letter No. 465, dated the 21st December 1899, from the Superintendent of Revenue Survey in Mysore, to the Secretary to the Government of Mysore, General and Revenue Departments.*

I have the honor to submit the following proposals for the revision of the assessment of the Sringeri Jahgir, situated in the Koppa taluk of the Kadur district.

Preliminary.

2. The land tenures in the Jahgir, of both Government (Matt) and Inam lands, as well as other matters essential to the object of this report, will all be noticed in their proper place; in the meantime I may introduce the Jahgir as a small tract of country, covering about 44 square miles and picturesquely situated outside the range of the Western Ghats. Mr. Rice tells us that as a Jahgir, and an endowment, Sringeri dates from 1346 A. D. when it was granted to the Matt of the Smarta Brahmins by Harihara, the first king of Vijayanagar. As the spiritual throne of a regular apostolical succession, however, Sringeri, or the immediate locality, goes back to the 8th century and the advent of the great Saiva reformer Sankaracharya. At page 402 of the Mysore Gazetteer, Vol. II, we are told that the religious establishment at Sringeri was intimately connected with the foundation of the Vijyanagar Empire which was founded only 12 years previous to the grant of the Jahgir.

Condition of the Jahgir.

* The Sringeri Jahgir Inam Settlement Regulation.

3. Before proceeding to the immediate object of this report I must briefly describe what that condition of the Jahgir has been which has necessitated * legislation for its settlement. The Jahgir, as I have already stated, was granted in A. D. 1346 and from that year up to 1385 a great many minor inams were granted by the Vijayanagar Kings Harihara I, Bukka Raya I, and Harihara II, and, in later years, the Gurus of the Matt also, from time to time, made still further alienations. The authority of the Matt within the Jahgir, as regards revenue matters, appears to have been unrestricted and in 1810-11 Dewan Purnaiya affirmed the power of the Matt to enforce the conditions on which the Minor Inams were held. Even the settlement made by the Nagar Rajah Sivappa Naik in 1651 was at the express invitation of the Matt, although at the instigation of the Minor Inamdars.

Pats Revenue Administration.

4. The Matt has always collected its revenue for the most part, in kind, and all the Minor Inams, whether granted by the Gurus of the Matt or, earlier, by the Vijayanagar Kings, have also been in kind; so many khandis of paddy or so many maunds of arecanut, as the land was wet or garden, being assigned as payable annually to the Inamdars by the Wargdar of a specified Warg. This state of things, both as regards wet land and garden land, continued up to 1651 when Sivappa Naik, very unjustly to my mind, demarcated the garden lands and put the Inamdars in possession, at any rate, titularly. The Wargdars continued to work the gardens, but unfortunately Keladi Sivappa Naik's Settlement recognized one-third of the gross yield as the landlord's (the Inamdar's) share and fixed $2\frac{1}{4}$ maunds of arecanut on every 100 dayas, brought to bearing as the proper rent. As in this Jahgir 500 dayas represent one acre, the exorbitant character of this "quasi" authoritative settlement may easily be imagined. Sivappa Naik's Settlement of the garden Inams had in short but one redeeming feature and that was its decisive character. All the garden Inams, have, as a consequence of that settlement, been identified and measured separately from the Matt or "Shist" Gardens, and their settlement presents no more difficulty

Exorbitant character of Sivappa Naik's Garden Settlement.

than would be experienced in any ordinary Government taluk. The injustice of Sivappa Naik's Settlement lay, not in the mode, but in the exorbitant rent directed to be paid by the Wargdars, as the Mulgenidars of the Inamdars.

Sivappa Naik's Settlement of wet lands.

5. The wet land Inams are precisely now as they have ever been. Sivappa Naik, beyond providing for the more accurate record of the Wargs from which the paddy payments were to be received, made no new departure in system, although he no doubt, with his graduated scale of rates, greatly raised the assessment, thus increasing both the payments to the Matt and to the Inamdar. One point must be here noticed, that as, naturally, paddy payments could only be made on the cultivated portions of a Warg, a fruitful source of evasion, especially as against the Matt's just rights, was opened and, as we shall see further on, freely used.

Effects of Past System.

6. It requires no great acumen to understand that, under such a system, the maintenance of fair and just relations between the parties concerned was improbable if not impossible. Which of the parties, the Matt, the Wargdar, or the Minor Inamdar, were the losers, I shall be able to make very clear before I close this Report.

Reasons for Sivappa Naik's Garden Settlement.

7. As I have already remarked, Keladi Sivappa Naik's Settlement in 1651 was brought about on the complaint, and at the instigation, of the Minor Inamdars and the reason, of course, was the growing importance, development and brilliant prospects of supari cultivation. The Minor Inamdars sought and managed, by Sivappa Naik's intervention, to divert from the cultivators to themselves the increasing profit from supari cultivation, as for instance, on wet lands converted into garden. The garden Inamdars are now reaping the toil of the Wargdar and are, of course, infinitely better off than if the old payments in kind had remained in force. The old payments were in paddy and to convert them into supari with the change in cultivation was a cruel impost.

Objects of Legislation.

8. It is immaterial to enquire on what grounds His Holiness the present Guru of the Matt applied to Government to have a settlement made of the Minor Inams. Those grounds naturally would include, amongst other matters, unauthorized alienation and the cessation of the objects of the grants. Government readily granted an Inam enquiry, were it only in the interests of good administration, and in short, passed the "Sringeri Jahgir Inam Settlement Regulation of 1897," which aims not only at an investigation into the inams of the Jahgir but at all the measures, including the Survey Settlement, necessary to effect not only a settlement of the Minor Inams but of the Jahgir itself generally.

Operations under Sringeri Jahgir Inam Settlement Regulation.

9. In exercise of the powers conferred by Sections 2 and 3 of the "Sringeri Jahgir Inam Settlement Regulation," Notification No. 5286-8—R. 1717, dated the 15th December 1897, directed, in itself, and under rules duly notified, (1) an investigation into the inams within the Jahgir, (2) the classification and assessment of the whole of the lands in the Jahgir, and (3) the ascertainment and record by the Classing Officer of the annual rental value, in terms of khandis of paddy, of the whole of the wet lands of every Warg, from the holder of which Inamdars have a right to receive specified annual quantities of paddy.

Operations still requiring sanction.

10. All the above operations, as provided for by rules under the Regulation, have been completed, excepting the fixing of the Survey assessment which follows as a matter of course upon the completion of the classification, and I now submit the usual proposals to which, as well as to the "Allocation Rules," which I shall allude to in the next para, the sanction of Government is necessary before any further progress can be made in the somewhat complicated, although necessary procedure, required to effect the settlement of the Minor Inams as contemplated by the Regulation.

**11.** At para 2 of the Notification of 15th December 1897, a promise was nade by Government that further rules would be framed and notified for the onversion into land Inams of paddy payments by allocating, within the area vailable for such purpose, an extent of land having a present annual rental alue equivalent to the number of khandis of paddy confirmed at the Inam ettlement, and I was directed to submit a draft, for the approval of Govern-ent, of those Rules which, for the sake of brevity, I shall hereafter speak of s the "Allocation Rules." The required draft I submitted with my letter No. Inam Department) 57, dated 9th February 1899.

**12.** I trust that I have made it clear why, at this precise stage of opera-ions, the sanction of Government is required, not only to the revised rates of ssessment, which I am now about to propose, but to the "Allocation Rules." he sanction of Government thus obtained, I propose, at the time of announcing he Survey rates under Section 113 of the Land Revenue Code, to also effect the llocation of Inams, an operation which, I am convinced, can only be effected n the spot, and which will require much care and labor.

**13.** Having thus briefly explained the situation and the stage arrived at n the procedure required to give effect to the objects and provisions of the Sringeri Jahgir Inam Settlement Regulation, I am at liberty to confine myself o the more immediate object of this Report which is to propose suitable rates of assessment. I will merely remark that the proposed Survey Settlement is iot, as would be the case, were we dealing with an ordinary Government taluk, a finality but a means towards a certain end. None of the operations contem-plated by the Regulation will be in any way compromised by sanctioning the proposed Survey rates, indeed as a matter of fact no further progress can be nade until they *are* sanctioned. Their suitability rests on their abstract merits and is in no way dependent on collateral operations.

Special Assistant's Report.

**14.** I append a printed report by my Special Assistant Mr. K. Rama-swamaiengar, who carried out both the Inam enquiry and the classification. I make no apo-logy for the somewhat great length of the above report, for the matter which Mr. K. Ramaswamaiengar has collated is all very useful and we cannot have too much information about this Jahgir which is one of the most interesting spots n Mysore. I think Mr. K. Ramaswamaiengar's report will prove a valuable record, being the result of, at any rate, close personal observation.

Descriptive.

**15.** I have already alluded to the origin of Sringeri both as a religious establishment and an endowment. As may be readily supposed, from the wild and beautiful character of the country, there is no lack of legendary lore. Its broad valley, pleasantly watered by the river Tunga and many minor streams descending from the encircling hills, forest-clad and abounding in romantic solitudes, renders this little tract of country an ideal retreat for the ascetic or the sage. The country immediately adjoining too, besides being very wild, contains, amongst other objects of interest, the common source of the Tunga and the Bhadra, at Ganga-mula in the Varaha parvata in the Western Ghats. No wonder then that the scene of many of the incidents in the Ramayana should be laid here. My pre-sent task, however, is the prosaic one of proposing suitable rates of assessment, and for what there is to tell, mythologically, I must refer to the interesting ac-counts given in the Mysore Gazetteer (Pages 377 and 507, Vol. II) and to para 39 of Mr. Ramaswamaiengar's report.

Boundaries.

**16.** The boundaries of the Jahgir, granted in 1346, were again defined by the Nagar Rajah Sivappa Naik in 1651. At the time of Survey the boundaries were quite undis-puted.

Statistics.

**17.** For so small a tract the number of villages is very great, and they are, for the most part, very small. The number, according to the old accounts, is even exceeded by the number by Survey, for, in many instances the lands of a village were found

to be situated in two or more places, and had, for the time being, to be measured as separate villages. All this will disappear after the Settlement, and I have no doubt that it will be found possible to amalgamate many villages, thereby greatly relieving the accounts. By Survey, then, the following are the villages constituting the Jahgir:—

| No. | Hobli. | Number of Villages. |
|---|---|---|
| 1. | Hechihonvalli .. .. .. | 78 |
| 2. | Chadervalli .. .. .. .. | 57 |
| 3. | Melpalu .. .. .. .. | 73 |
| 4. | Kolpalu .. .. .. .. | 45 |
| | Total ... | 253 |

Descriptive.

18. The Jahgir, almost circular in shape, with a diameter of 7 miles, is a broad valley almost literally encircled by hills, excepting where the river Tunga enters and leaves it. This river, following a most tortuous course, divides the Jahgir roughly in half, East and West.

Sringeri as part of the Koppa taluk.

19. In the Settlement Report of the Koppa taluk settled in 1879, the following occurs: "Sringeri which is the natural "centre of the taluk both in position and as "being the head-quarters of the High Priest of the Smarta Brahmins, has "been selected as the place for all the roads to meet and should eventually be-"come a place of considerable mercantile importance." It is, in fact, the most central, the most level and the most accessible portion of the Koppa taluk.

Climate.

20. The climate is that of the true Malnad, the rainfall in the Jahgir itself averaging, on figures from 1889 to 1898, about 151 inches, a very heavy fall, indeed, and little short of that in the tracts quite within the Western Ghat range. The average rainfall for the whole of the Koppa taluk, as given in the Mysore Gazetteer, on the figures of 16 years, is 119 inches.

Crops.

21. With such a climate, rice, it is needless to say, is the staple crop, and of this there are, as described by Mr. Ramaswamaiengar at para 13 of his report, a great many varieties and modes of cultivation. The Jahgir is also famous for its arecanut gardens which are excellent even in a country like Mysore, with which, in this particular respect, no other country can compete. With the arecanut, subsidiary crops of cardamoms, black pepper, betel-leaf and plantains are taken. Dry crops are only very occasionally grown in the high lying rice lands or "Makki" as they are called. According to Mr. Ramaswamaiengar, coffee cultivation is receiving attention and has been to some extent successful. The Koppa taluk, in which the Jahgir is situated, is a great coffee-growing taluk, so that the growing of coffee in the Jahgir can scarcely be regarded as an experiment but rather as a good beginning in an industry which is sure to succeed.

Characteristics of the country.

22. At para 5 of his report Mr. Ramaswamaiengar remarks that "the Jahgir has all the advantages and disadvantages of a purely Malnad climate." Accepted literally and in regard to climate only, there is nothing misleading in the above statement, but people are apt to associate with a Malnad climate a great deal more than the phrase should imply, and a wild and impracticable country is at once suggested. Mr. Rice also (at page 402 of the Mysore Gazetteer, Vol. II.) gives this view when he writes of the inaccessible character of the country. As a matter of fact, the Jahgir possesses advantages which very far remove it from the category of inaccessible Malnad. It is in itself so fairly level, so accessible, not only because of its many roads, but owing to the comparative absence of natural obstacles to the North and East, that it must not be confounded with the wild, inaccessible and comparatively unopened country which composes most of the Malnad tracts. It is true that it is encircled by hills, but these do not cut up the Jahgir at all and are in fact an advantage to it rather than not.

Roads.

23. When the Koppa taluk was settled in 1879 the work of providing good roads had only just been seriously taken in hand. Six years previously (to 1879) only one road, that from Koppa to the Agumbi Ghat, existed, but by 1879, the Settlement Report tells us, "the country was covered with a net-work of roads either "made or in course of construction and carts were coming into common use."

Improvements of a general character.

24. The roads were in fact well commenced in 1879, and the Settling Officer, in fixing his rates for the Koppa taluk, made prospective allowance because the roads, although not finished, were well assured. But there were other things which, although talked of at the time, only loomed in the future. Amongst these the chief are the Railway line from Bangalore to Harihar and the bridge across the Tunga at Hariharpur. At page 385 of the 2nd Volume of the Mysore Gazetteer, Mr. Rice writing in 1897 observes: "It is only during the last 20 years that the "Malnad parts (of the Kadur district) have been opened up by a net work of "roads and only in 1889 that the Railway has run through a small part of the "district. These agencies are effecting considerable changes in trade and the "transport of commodities, the full effect of which can hardly yet be seen." Trade statistics are not forthcoming to indicate precisely what has been the effect of all the improvements which have taken place in the means of communication, and we must be content to accept results, as indicated by prices, without attempting to trace cause and effect with precision. The question of prices will be taken up further on when it will be seen that they have greatly risen.

Future improvements.

25. In addition to improvements actually effected, there is the near opening of the Railway from Birur to Shimoga and the bridge at Tadasa fast approaching completion.

Comparison with Koppa taluk.

26. In attempting to arrive at a correct estimate of the condition and resources of the Jahgir it is impossible, as it would be unwise, to avoid comparing it with the Koppa taluk, in the heart of which it is situated and about which much information has been recorded, and regarding the working of the settlement of which we now know a good deal. Even at the time of the settlement of the Koppa taluk, the Sringeri Jahgir was superior in natural and conferred advantages, in the shape of roads, to the very best part of the taluk and now its condition is very much better than it was 20 years ago. Sringeri is a much more accessible place than it used to be and the infusion of outside interests, brought so much nearer by good roads, cannot fail in time to be beneficial especially if, as I sincerely trust may be the case, the present settlement will make the cultivators more free agents than they are at present.

Statistics.

27. During classification the following statistics were collected and recorded.

| Village. | Houses. | Population. | Square miles. | Cattle. | Ploughs. | Carts. | Market. |
|---|---|---|---|---|---|---|---|
| 253 | 1,516 | 7,380 | 44 | 7,848 | 1,183 | 58 | 1 |

Population.

The population, 167 to the square mile for the whole area, and 738 to the square mile for the culturable area only, is decidedly dense for a malnad tract. For the Koppa taluk, excluding Sringeri, the same figures were only 63 and 471, respectively. Again, while in the Koppa taluk there were only, at the time of settlement, 21 carts, this little Jahgir possesses 58 carts; small totals no doubt in each case, but, for purposes of comparison, interesting. It is true as explained by Mr. Ramaswamaiengar at para 3 of his report, that the population of the Jahgir is swollen by the large number of Brahmins and other servants maintained by the

Matt and abnormally, at certain times, by an influx of coolies from below the Ghats. Making every allowance, however for these abnormal items, the Jahgir is well populated at 157 to the square mile, as against only 116 for the whole Kadur district. The Census of 1891 gives the total population of the Jahgir as 9,061 against 7,848 by the classification Census. I imagine that the difference, 1,213, is due chiefly to the floating portion of the population and no doubt in a measure to the more careful counting at the regular Census. The figures of the latter are of course much more favorable to the deductions I have made above as to the prosperity of the Jahgir and will also explain the difference between my figures and those adopted by Mr. Ramaswamaiengar at para 3 of his report.

28. The next thing is to see how the lands of the Jahgir have been divided up by survey. This is shown below :—

Division by Survey.

| Description. | Government area. | | Area of Inam. | Total. | | Grand Total area. |
|---|---|---|---|---|---|---|
| | Occupied area. | Waste area. | | Occupied area. | Waste area. | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| Dry ... ... | 48 | 55 | 4 | 52 | 55 | 107 |
| Rice ... ... | 4,536 | 129 | 94 | 4,630 | 129 | 4,759 |
| Garden ... ... | 1,115 | 68 | 726 | 1,841 | 68 | 1,909 |
| Total . . | 5,699 | 252 | 824 | 6,523 | 252 | 6,775 |
| Area of roads, village sites, &c. ... . ... . . | | | | | | 20,845 |
| Total area for the whole Jahgir, 44 square miles .. ... . . | | | | | | 27,620 |

The above figures showing as they do the actual results of survey, furnish the best possible opportunity of explaining, by their aid, the complicated revenue system and tenures of the Jahgir.

29. It will have been gathered from my previous remarks that the wet Inams are all in paddy and that no occupancy of the land has been given to the Inamdars but that in the case of garden lands the Inamdars have been put titularly, in possession, consequently the garden lands appear under their respective heads of Government and Inam, while the wet land has to be shown under only one head, it being practically, until the paddy Inams have been allocated, Government land.

Nature of Inams.

30. There are 107 acres of dry land which have no place or recognition in the accounts and which are simply the results of careful classification of little bits, here and there, of unirrigable portions of fields.

Dry land.

31. There are in all 4,759 acres of wet land, as detailed in the statement at para 28. Of this area, 4,536 acres are occupied and from this area comes: (1) all payments, whether in money or in kind, made to the Matt and (2) all paddy payments to Minor Inamdars. The really unoccupied wet land consists of 129 acres and needs no remark. The 94 acres shown as Inam were no doubt once garden land now

Wet land.

deteriorated to wet land, and being entered in the accounts in the Inamdars' names, have been separately measured. What has chiefly to be borne in mind is that the 4,536 acres of wet land occupied contribute, adopting an uniform money standard at Rs. 1-2-0 per khandi of paddy, Rs. 7,200 to the Matt and Rs. 14,669 to the Minor Inamdars.

Tenure of wet land.

32. The Minor Inamdars seek to prove that in 1872-73 the Matt, in the absence of the Inamdars, and without their consent, entered in the accounts the names of the genivokalu or cultivators and issued Pattas without entering even the "Bijwari" the Inamdars have a right to. The insinuation of course is that the wet lands constituting the Inam were defined or definable and that their area was to be found entered in the accounts. Enquiry has proved this assertion of the Minor Inamdars to be groundless. The Survey has entirely failed to find wet land in the actual possession of and entered in the names of the Inamdars as Pattadars, excepting of course 94 acres, as explained in the preceding para, which must at one time have been garden. This exception is useful as proving the rule, and we may accept the fact that wet lands were never defined or marked off and that the assignments as Inam have always been in the shape of so many khandis of paddy payable to the Inamdar by the Wargdars of specified Wargs; the Inam was in short a diversion of the Matt's revenue to the Inamdar.

Garden land.

33. Unlike the wet lands, the garden lands have been easily identified and their settlement will give no more trouble than would the same operation in any ordinary Government taluk. The terms upon which the Inam gardens are held by the cultivators as compared with the "Shist Gardens," as I shall call those held direct from the Matt on money assessment, are very curious.

Government or "Shist Gardens."

The "Shist Gardens" measure 1,115 acres and pay assessment direct to the Matt. They are very fairly and reasonably assessed, enjoy greater fixity of tenure and are more appreciated and consequently more cared for than the Inam Gardens. They may be divided into (*a*) gardens paying rent in kind, (*b*) gardens paying Sivappa Naik's Shist in full at Rs. 4-2-7 for every 100 dayas, (*c*) gardens paying reduced rate at $\frac{3}{4}$ of Sivappa Naik's Shist, (*d*) gardens held on Shraya or gradually increasing assessment, and (*e*) gardens Banjar or waste.

Inam Gardens.

34. The Inam Gardens measure only 726 acres. Their beriz amounts to Rs. 13,353, but this is by no means what the cultivators pay the Minor Inamdars. Both my Assistant and myself estimate that the amount paid to the Inamdars cannot be *less* than Rs. 30,000 and it may be more. Sivappa Naik's Settlement apparently carried with it the right to recover $2\frac{1}{4}$ maunds of nut on every 100 dayas brought to bearing, and as in this Jahgir 500 dayas go to the acre, Sivappa Naik's rate, at present prices, meant about Rs. 100 per acre. There are a few instances of the original garden cultivators having bought up the Inam rights, and these now work their own gardens. There are also a few gardens which pay "Sivappa Naik's Shist," generally to temples or absentee Inamdars. With these exceptions, the cultivators of these Inam Gardens, the Mulgenidars (permanent) or the Chargenidars (from year to year), as the case may be, pay to the Minor Inamdars, as far as the latter can exact it, the exorbitant rent which formed a "quasi" authoritative part of Sivappa Naik's Settlement. Under such circumstances it is not likely that the Inam gardens should receive the same care and attention as the "Shist Gardens." Mr. Ramaswamaiengar, at para 23 of his report, states that owing to the rigidity with which the Minor Inamdars enforced the payment of Sivappa Naik's Guttige in kind, the Mulgenidars have spent less on the gardens and have even let them fall into decay in hopes of some reduction of terms.

Tenures and Rates.

35. My Assistant's report may be read with advantage, para 22 for tenures and para 24 for the rates prevailing in the Jahgir.

36. The following statement shows the weight with which the old assessment has borne upon the Wargdars :—

Weight of past assessment.

37. Properly speaking, the above statement should show only the revenue paid to the Matt, but as the wet land is still unseparated into Government and Inam and is all in the possession of the Wargdars, I have shown the whole area and the payments made to both Matt and Minor Inamdar. The garden and dry crop land shown are Matt (Government) land, the Inam land under those heads not being shown at all. The revenue has all been reduced to one common money standard, paddy at Rs. 1-2-0 per khandi and supari at Rs. 8 per maund.

38. It will be seen that for these wet lands the Wargdars pay the Matt Rs. 7,200 and to the Minor Inamdars Rs. 14,649, in all Rs. 21,849, which gives an average of Rs. 4-13-1 per acre. The garden lands pay an average of Rs. 9-11-10, which for such excellent gardens is quite moderate. Dry crop land has never paid anything at all.

Average rates of Government garden and dry land hitherto paid.

39. As an average of Rs. 4-13-1 per acre for wet land is very high, in fact higher than I could possibly propose for the Survey Settlement, it may very fairly be asked, unless the increase is to be on the garden land, how the settlement is likely to benefit the Matt financially. The answer is, that although the Survey rates will be somewhat lower than the old rates, the right horse, to use a vulgar but appropriate aphorism, will be saddled. The Matt now gets about Rs. 7,200 (the assessment, at my proposed rates, of about 1,600 acres) from the wet land but after the allocation of Paddy Inams, for which 2,000 acres will certainly suffice, the Matt will get the assessment of quite 2,700 acres of wet land. To put the case conversely, the Minor Inamdars have hitherto put quite 3,000 instead of 2,000 acres of wet land under contribution for their paddy payments, leaving but little to the Matt.

Average Wet Rate hitherto paid.

Unequal distribution of Past Assessment.

40. The truth is that both Minor Inamdar and Wargdar have taken advantage of the Matt, but the Wargdar has been as nothing in the hands of the Minor

Inamdars. It is evident that, so far as paying any revenue is concerned, more than 1,000 acres of wet land have disappeared from the ken and control of the Matt. As it is quite a mistake to suppose that any appreciable proportion of the 4,536 acres of wet land under occupancy is left uncultivated, year by year, the natural conclusion is that the plan adopted has been to pass off cultivated land as uncultivated and therefore not liable to contribute paddy, or even to point out as the uncultivated portions of a Warg "kharab" land outside it.

Relative influence of Matt, Minor Inamdars and Wargdars.

41. Whatever there has been of loss, whether on the plea of the land of the Warg being left uncultivated, or from remissions, for any cause, has all fallen on the Matt, the Minor Inamdars seldom failing to get their grain dues whenever at all practicable.

Loss to the Matt.

42. The revenue of the Matt for the last 12 years has been as follows :—

Past Collections.

| Year. | Total demand. | Remission on account of Sagavali Nasta. | Total collection | Remarks. |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 1886—87 | 18,096 | 1,333 | 16,763 | |
| 1887—88 | 18,705 | 1,322 | 17,383 | |
| 1888—89 | 18,716 | 1,291 | 17,425 | |
| 1889—90 | 1,900 | 1,270 | 17,730 | |
| 1890—91 | 18,958 | 1,163 | 17,795 | |
| 1891—92 | 19,079 | 1,227 | 17,852 | |
| 1892—93 | 19,006 | 1,189 | 17,817 | |
| 1893—94 | 19,567 | 1,372 | 18,195 | |
| 1894—95 | 19,772 | 1,403 | 18,369 | |
| 1895—96 | 19,951 | 1,488 | 18,463 | |
| 1896—97 | 20,081 | 1,420 | 18,661 | |
| 1897—98 | 20,294 | 1,640 | 18,654 | |
| 5 years' average | | | 18,468 | |
| 10 years' average | | | 18,096 | |
| 12 years' average | | | 17,926 | |

The period for which the returns are forthcoming is certainly somewhat short, but I have been unable to obtain reliable information for earlier years. The actual collections for 12 years will however suffice to denote the average range of the revenue. The collections show slight but still steady improvement year by year, a result due to the rise in prices. Remissions have been of two classes (1) permanent, under the head of "berizbaki," entered since 1872-73 on estimates based on the actuals of former years, and (2) temporary, dependent upon the fluctuation of the cultivated area. After all, the remissions have been fairly uniform, and my own impression is that the area left uncultivated in the occupied holdings is very small indeed and has, for obvious reasons, been greatly exaggerated. Whatever land could be palmed off as fallow meant so much remission of assessment.

43. The prices which have prevailed since 1879, when the Koppa taluk was settled, demand consideration. They need only be given for rice and supari and perhaps for cardamoms and pepper :—

| 1897–98 ... ... ... ... | 8 | 9 0 0 | 70 0 0 | 4 0 0 | |

44. Cardamoms and pepper are only subsidiary crops in the supari gardens, and the fluctuation in price is proportionately unimportant. Supari, as is generally the case with garden products, the causes of fluctuation being much more various and abnormal than those affecting food grains, shows great rise and fall although on the whole its price may be said to be better now than it was 20 years ago. Rice on the contrary shows a steady and marked increase during the last 20 years, and it will be quite fair to adopt somewhat higher rates of assessment than would have been justifiable at the commencement of the period. So readily is paddy now disposed of and so marketable is it that I have been assured that the Matt would, any year, gladly buy up the whole out-turn of the Jahgir.

45. For the purpose of assessment I propose to adopt uniform maximum rates for the whole Jahgir, no grouping being necessary for so small a tract with characteristics varying but very slightly. I show below my proposed Maximum rates in contrast with those adopted for the Koppa taluk 20 years ago :—

Proposed Maximum rates of assessment.

| | | Sringeri. | Best group of Koppa taluk. |
|---|---|---|---|
| | | Rs. a. p. | Rs. a. p. |
| Compared with Koppa ... | Wet ... | 6 4 0 | 5 8 0 |
| | Garden ... | 15 0 0 | 18 0 0 |
| | Dry ... | 0 12 0 | 0 12 0 |

It is only for wet lands that I propose a somewhat higher maximum rate than for Koppa, a difference fully justified by the rise, certain to be permanent, in price during the period the Koppa Settlement has run. I should have also raised the garden maximum slightly but I have adopted a somewhat low maximum in order to be in accord with the standard of assessment on supari given effect to under Government Proceedings No. 1888-90—R. F. 49-92, dated 19th August 1896. Under that Order, Koppa now has a maximum of about Rs. 15, and I have adopted a similar maximum for Sringeri.

46. My proposals give the following results on the occupied land :—

Results of Proposed Rates.

| Group | Villages | Dry | | | Rice | | | Garden | | | Total | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Acres | Assessment | Average rate | Acres | Assessment | Average rate | Acres | Assessment | Average rate | Acres | Assessment | Average rate |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 |
| 1 | 253 | 48 | 28 | 0-9-4 | 4,536 | 19,075 | 4-3-4 | 1,115 | 12,801 | 11-7-8 | 5,699 | 31,904 | 5-9-7 |

The wet lands, being superior to those of the Koppa taluk generally and having also a higher maximum, work out to a pretty high average rate of Rs 4-3-4 per acre. This average although high is nothing to what Sivappa Naik's wet rates were. It will be observed that, pending the allocation in land of paddy payments, it has been necessary to show the whole wet area as Government land. The average survey rate of this wet land is Rs. 4-3-4 per acre against an average of Rs. 4-13-1 hitherto paid by the Wargdars to the Matt and the Minor Inamdars together. This does not mean that the burden on the Wargdars will be less, to the extent indicated by the above average rates, for, on about 2,000 acres, they will, after allocation, pay to the Minor Inamdars, not survey assessment, but annual rent as Kadim tenants of the former who will be the superior holders. The following figures indicate, I think, pretty accurately the present and future position of the Wargdars.

| | | To the Matt Rs. | To the Minor Inamdars Rs. | Total Rs. |
|---|---|---|---|---|
| Position past and future of Wargdars. | Paid at present .. ... | 7,200 | 14,649 | 21,899 |
| | *Future.* | | | |
| | On 2,000 acres as Kadim tenants of the Inamdars... .. | | 11,000 | 21,670 |
| | On 2,536 acres survey assessment direct to the Matt. .. .. | 10,670 | . | |

47. The Wargdars, it will be seen from the above, will be very much in the same position as they have hitherto been, so far as the actual amount which they pay is concerned, but they will have a vastly improved tenure in holding a well defined and large area direct from the Matt at the survey rates of assessment, and, even as regards the lands which will be allocated as Inam, they will have the option of resigning their position as Kadim tenants of the Inamdars. The Matt, as is only right, regains its rights, which have been so long impaired under a faulty system, and will be a considerable gainer. The Minor Inamdars will get, and in land moreover, as much as they are entitled to as a result of the Inam enquiry.

Effect of proposed settlement on Wargdars.

On Matt.

On Minor Inamdars.

48. The proposed settlement is calculated to affect the Matt financially as follows :—

Financial results as regards Matt.

| Description of land | Past collections | By survey | | | Remarks |
|---|---|---|---|---|---|
| | | Acres | Assessment | Avearge rate | |
| | | | | Rs. a. p. | |
| Dry ... ... ... | ..... | 48 | 28 | 0 9 4 | |
| Wet ... ... ... | 7,200 | 2,536 | 10,670 | 4 3 4 | |
| Garden ... ... ... | 10,857 | 1,115 | 12,801 | 11 7 8 | |
| Total ... | 18,057 | 3,699 | 23,499 | 6 5 9 | |

There will thus be an immediate gain to the Matt of Rs. 5,442 or over 30 per cent on the past revenue.

49. There are moreover the following unoccupied assessed lands which, it is only reasonable to suppose, may be taken up for cultivation ere long:—

Unoccupide lands available for cultivation.

| Description. | Acres. | Assessment. | Average rate. |
|---|---|---|---|
| | | | Rs. a. p. |
| Dry ... | 55 | 24 | 0 7 0 |
| Wet ... | 129 | 447 | 3 7 5 |
| Garden ... | 68 | 349 | 5 2 1 |
| | 252 | 820 | 3 4 1 |

50. The Inam lands are as below :—

Inam or alienated land.

| Description. | Acres. | Assessment. | Average rate. |
|---|---|---|---|
| | | | Rs. a. p. |
| Dry .. | 4 | 2 | 0 8 0 |
| Wet .. | 94 | 255 | 2 11 5 |
| Garden .. | 726 | 8,133 | 11 3 3 |
| | 824 | 8,390 | 10 2 11 |

The wet land shown above was the only land of the kind identifiable at the Survey as entered in the accounts and enjoyed as Inam land. It is presumed that it consists of land once garden but now deteriorated. The 726 acres of garden are described at para 34 and are enjoyed by the Inamdars who for the most part rent them to their Mulgenidars at the enormous rent already described as resulting from Sivappa Naik's Settlement in 1651.

51. The one-anna Local Cess being a fixed rate varying with the collections, requires no notice.

Local Cess.

52. Grazing has hitherto realized only Rs. 7 annually. Under the proposed settlement the proceeds cannot well be less, but in a country like Sringeri must always be insignificant.

Grazing.

53. The remuneration of village servants (patels and shanbhogs) will probably cost the Matt about Rs. 1,700, but towards this Rs. 288 and Rs. 247 already paid to shanbhogs and patels respectively (See para 24 of Assistant's report) will be appropriated leaving the fresh expenditure necessary at about Rs. 1,200 only.

Remuneration of village servants.

54. The financial results briefly summed up are, Rs. 5,442 immediate gain in the assessment of occupied lands with some prospective increase from the taking up of assessed waste land, and also by the imposition of Quit-rent which would of course mean a reduction in the area of 2,000 acres of wet land calculated by me as the extreme requirement for allocating the present paddy Inams. Against the above increase, immediate and prospective, there would be

Financial results of proposed settlement summed up.

the necessary and useful outlay of Rs. 1,200 for the remuneration of shanbhogs and patels.

Conversion rates of kind into money.

55. Throughout this report payments in kind have, for purposes of comparison, been converted to a money standard, supari at Rs. 8 per maund and paddy at Rs.1-2-0 per khandi. It is only regarding the latter that I have any doubt. If my rate, Rs. 1-2-0 per khandi, is too low, and certainly it is below the market price, then the gain to the Matt, calculated above at Rs. 5,442 on the occupied land, would have to be reduced by about Rs. 800, if we take the price of a khandi of paddy at Rs. 1-4-0, which I think is the highest that could possibly be adopted. I did not adopt the lower rate of Rs. 1-2-0 per khandi without due consideration. The Wargdars, we may feel sure, do not give the best of their paddy in payment of their grain dues, and what they give is not always free from impurity; moreover the payments are generally made just after harvest when grain is cheapest. Another point is that sometimes the Matt, in some particular year, consents to take money instead of paddy from the Wargdar and, when it does so, less than the market rate regulates the commutation. All things considered, I thought it safer to be too low than too high in my estimate. Of course the Minor Inamdars make out the price of paddy to be very high, but this is in order to substantiate their prayer to have the Quit-rent charged on the assessment and not fixed by deduction from the total claim passed at the Inam enquiry.

56. I have found it impossible to convey a proper idea of the effect of the proposed settlement without alluding to collateral operations, especially the allocation in land of paddy Inams. For the justice and fairness, however, of the proposed rates I am quite content to appeal to the rates already adopted in the Koppa taluk. If anything, looking at the rise in the price of rice during the last 20 years, the Sringeri rates on wet land are slightly too low compared with Koppa.

57. I regret having to write at such great length, but the circumstances of the Jahgir are so peculiar and the settlement so complicated that I have been forced into detail.

Anticipations of effect of settlement.

58. A great deal has been done for the Jahgir. Commercial communication with the outer world has been fostered by a system of good roads, and I cannot help thinking that the improved tenure which we are certainly conferring upon the Wargdars, the real producers, will lead to a better future for them. Amongst other effects of the settlement, we may expect an extension of supari cultivation, which the past system in many ways tended to prohibit.

Map and Classwar Statement.

59. A map of the Jahgir and the usual Classwar Statement are appended, as well as a printed copy of Mr. K. Ramaswamaiengar's report so frequently alluded to.

Report requiring sanction.

60. In soliciting sanction to the rates now proposed I venture to draw attention to my letters Nos. 56 and 57 (in the Inam Department) both of the 9th February 1899, the first recommending the modification of Rules VI and XV of the Inam rules as applicable to Sringeri, and the second submitting a draft of further rules for the conversion into land Inams of paddy payments by allocation. It will be obvious that as the modification of the Inam Rules, the allocation Rules and the survey assessment are all dependent one upon the other, in carrying out the purpose of the Sringeri Jahgir Inam Settlement Regulation, no further progress can be made till all receive sanction.

(2) *Report on the Sringeri Jahgir, Kadur district, classed by the (E) Establishment, Mysore Revenue Survey.*

The Sringeri Jahgir is hemmed in on all sides by the Koppa taluk, of which it forms the most open and central portion.

2. *Area.*—Its extreme length, north and south, is 8½ miles, and its extreme breadth, east and west, is 6 miles. The total area, as per survey, is 27,632 acres

or 43·175 square miles, of which 6,694 acres, or 10·46 square miles, are arable, consisting mainly of wet and of garden lands, the particulars being as follows:—

| | A. | g. |
|---|---|---|
| Dry .. .. .. .. .. | 113 | 27 |
| Wet .. . .. .. .. | 4,754 | 10 |
| Garden .. .. .. .. .. | 1,826 | 15 |
| Total .. | 6,694 | 12 |

Sringeri, of antiquity and historic fame, the head-quarters of the Jahgir and of the Jagat Guru, is almost centrally situated on the left bank of the Tunga, 15 miles from Koppa and 13½ miles from the head-quarters of the Koppa taluk, Hariharpur.

3. *Population.*—The population of the Jahgir, according to the Census of 1891, is 9,061, which gives an average of 234 per square mile of the total area (which is less than the density of the Bangalore district, but is nearly the same as that of the Mysore district) and of 863 per square mile of culturable area. This high average is due to the large number of Brahmins and other servants maintained by the Matt and also to the floating population of below-ghat coolies who work in the Jahgir from November to May. Brahmins form nearly ⅓rd of the population.

4. *Division.*—The Jahgir is divided for administrative purposes into four hoblis or palu and contains 253 villages distributed over the several hoblis as shown below:—

| | No. of villages. |
|---|---|
| 1. Hecha Honnavalli .. .. .. .. | 78 |
| 2. Chidervalli .. .. .. .. | 57 |
| 3. Melpal .. .. .. .. | 73 |
| 4. Kelpal .. .. .. .. | 45 |
| Total .. | 253 |

Most of the villages are comparatively small.

5. *Climate and Rainfall.*—The Jahgir may be said to be a valley enclosed, as it were, by a girdle of mountains; it has all the advantages and disadvantages of a purely malnad climate. Rain is excessive in the months of June, July and August, when the south-west monsoon breaks. The "Mungar" rains set in, in April or May. The late rains of the north-east monsoon are far from heavy. During winter the mornings are very foggy and cold; during summer the heat is excessive though the mornings and evenings are cool on account of fog. The Jahgir is not free from malarial fever generated by the extensive decomposition of vegetable matter. The fever which sets in after the early rains as well as that appearing after its cessation does not spare the Jahgir population. When it pours heavily the season is considered healthy. The annual rainfall varies from 140·75 inches in 1890-91 to 206-88 inches in 1896·97. Regular rainfall returns are available only since 1890-91.

6. *Drainage.*—The river Tunga enters at the south-western corner and runs in a north-easterly direction as far as Kavadi and then runs east, leaving the Jahgir, after many picturesque turns and bends, in the north-east corner. It takes a striking bend round Vidyaranyapur, where an agrahar of 100 *vrittis* was founded by Harihar Mahraj II in honor of Vidyaranya, who as Mantri Madhva helped in the formation of his kingdom. As the watershed is in no part distant, the hill streams, though not of great size, are many, the most important being the two that join the river near Sringeri, one to the north-east and another to south-west, the one joining near Kavadi, and the other Kotadihalla joining near Auguradi. The river is not utilised for purposes of irrigation, on account of its steep and high banks. Successful attempts have been made to utilise the hill streams for purposes of irrigation by damming them up. Gandu Guddehalla has been dammed up by rough stone work near Gundre, and the channel drawn

from it irrigates the wet lands and gardens in Gandagudde, and Sunkardi, the gardens in the latter being in a flourishing state. The Yekkanahalla is dammed up near Mandagar, and the channel drawn irrigates the wet lands of Mandagar, Akkravalli, Honnargudde, Muttadagadde, and ends with the areca garden in the Matt compound. The old anikat further west was abandoned some years ago. The anikat near Bhimanakoppa is also utilised to some extent for irrigation. The paddy flats on the top of a ridge once irrigated by this stream are now banjar, as the anikat and channels are out of order. These channels might well be utilised for raising a double rice crop, or after-green crop or sugar-cane, but the Wargdars are apathetic. Even in the heart of the malnad these irrigation channels impart higher value to the lands they command. By means of such channels the sides of ridges are converted into paddy flats. By improving the existing ones and multiplying them at convenient points and by utilising them for raising wet and garden crops, the Jahgir will be benefited to no small extent.

7. *Physical Features.*—The Jahgir is almost encircled by high ranges, the Jahgir boundary running on the crest of the hills to the east and south, while the range of hills on the west is not far off from the Jahgir border. The hill-sides are well clad with primeval forest, through which the streams and streamlets thread headlong their way till they join the Tunga, fertilising the valleys on their way. The Halgargudda is the highest peak in the Jahgir, 3,058 feet above the level of the sea. The Sringeri valley has its own undulating ridges and valleys, the latter generally covered by forest trees. The valleys look very picturesque with their areca garden at their heads; on some hill-sides the areca gardens, tier on tier, present a very picturesque view. Sringeri hillock in Sringeri has a celebrated temple on its top. This is the shrine of Vibhandaka Rishi. The hill-tops on the borders of the Jahgir are not crowned by any temples as in the maidan parts of the Province, attention in this direction having been directed to Sringeri and the banks of the Tunga.

8. *Tanks.*—The Jahgir has a large number of small kattes or ponds at the top of valleys adjoining the hill-sides, besides two minor tanks in Herur and Nallur.

As the raiyats have to maintain them, many of them are not in good condition. These kattes are mainly maintained for irrigating areca gardens below them during the hot months of March and April; where hill streams are not utilised for garden cultivation, these tanks and kattes are maintained and utilised.

9. *Channels of Irrigation.*—These are neither numerous nor of great importance. The three irrigation channels from hill streams have been dwelt on in para 6 above. Many a small channel is led off from the hill streams for irrigating gardens and rice fields. Most of the rice fields depend upon rain water led off by streamlets. When the rains are excessive, the low-lying flats suffer and Makki lands flourish.

10. *Cattle.*—In the Jahgir, agricultural cattle are very inferior even for purposes of wet cultivation. For draught purposes good bullocks are used. Although the Matt imports a superior breed of cows and bulls, there has been no improvement in the cattle of the Jahgir. They do not seem to flourish well. The heggadays seem to pay more attention to the number of heads of cattle they own than to their quality as they attach greater importance to their droppings for areca gardens, than to their capacity for work. There is little grazing ground around Sringeri. During the rainy season the bullocks are sent to the Nemmar and Yedahalli maganis for grazing. The Amildar furnishes the following statistics under this head:—

| | |
|---|---|
| Bullocks ... ... ... ... ... | 2,288 |
| Cows and calves ... ... ... ... ... | 3,785 |
| Buffaloes ... ... ... ... ... | 1,007 |
| Goats and sheep ... ... ... ... ... | 91 |
| Carts ... ... ... ... ... | 59 |

The number of carts in the Jahgir is comparatively small, as most of the traffic is carried on by outside carts, which ply their trade from November to May.

11. *Soils.*—The soils vary but little, being chiefly a good loam ranging from red to grey, richly alluvial in the low-lying parts of valleys renewed by the decomposed vegetable matter, &c., washed down by rains. The soils to the west of the Tunga are generally richer than those to the east, for wet cultivation. The soils in the Jahgir contain a free admixture of mica particles said to be good for retaining moisture. The faults are "karal" and sand as usual, the Makki having more of the latter than the low-lying lands. The soils in supari gardens are renewed every other year by fresh earth removed from the sides of the high ground (hillocks or hills) adjoining, by leaves, green and dry, and the mould consisting of cattle droppings mixed with leaves, green, described further on at para 16.

12. *Mineral Resources.*—Ruby, corundum and other non-metallic varieties—blue and black, found in Jodikunigudde about 1½ miles from Sringeri by the side of the Norwi road, are attracting the attention of European capitalists. The required specimens are picked out after heavy rains from among the washings of the hill stream where it joins the river. No attempt has been made to make borings by following up the veins to find good specimens. Mica and iron ore appear in many places. Mica plates about 8 inches by 5 may be found in several parts of the Jahgir to the east of the Tunga, at a few feet below the surface. No borings have been made for finding better specimens. A geological survey of the Jahgir would no doubt lead to the development of its mineral resources.

13. *Crops.*—A little ragi is grown in some parts of Makki rice fields. The wet crops grown are mostly rice and a little sugar-cane. The latter is only grown in small patches for home consumption, here and there. The varieties of paddy cultivated are—

(1) Bile Batta—Ordinary red rice.
(2) Kempu Batta.
(3) Jirige Sanna.
(4) Sanna Batta.
(5) Kar Batta.

The ordinary variety of malnad paddy, yielding red rice, is grown in the largest quantity. The Bile Sanna Batta is grown in small selected areas by well-to-do raiyats for home consumption, as this requires care, the seed deteriorating in 3 or 4 years. Jirige Sanna is also grown in small selected areas for home consumption on special occasions. The Kar Batta is grown in Makki lands as requiring less water. A single crop is now raised in the year, though in many places there is room for double crops to be grown without any difficulty. Sugar-cane and after-green crops may also be conveniently raised on account of the facilities of soil and water, but the Wargdars are apathetic. There are three ways of growing paddy :—

(1) Transplanting in low-lying land.
(2) Sowing broadcast.
(3) Ganda Garige.

The last consists of sowing broadcast seed paddy mixed with burnt manure in well-watered flats, and by alternate watering and drying 2 or 3 days at a time, the seedlings come up. During the rains these lands are irrigated with others. This method as requiring labour is rarely resorted to, but it is supposed to yield the largest out-turn. The average out-turn of rice is 8 to 25 times the amount of seed sown. Vegetable gardens in small patches are opened out in many villages during summer for growing country vegetables, chiefly Banna Sowte, for use during the rainy season. This variety of cucumber keeps well for 6 or 7 months.

*Supari.*—The staple garden crop of the Jahgir is supari grown in gardens found nearly in every village. The Jahgir is renowned for the nut grown therein. The best gardens are to be found in the north, north-east and east. Besides supari, these gardens yield subsidiary crops, plantains, black pepper, betel-leaf and cardamoms. The last formed some years ago a very valuable item in some of the gardens. On account of the fall in price, cardamom cultivation does not receive the attention which it once did. The plants are deteriorating in several places. The recent gradual and steady rise in the price of supari has given a great impetus to supari, cultivation and the resuscitation of old gardens. The Jahgir authorities have been encouraging the supari cultivation by granting fresh lands on "shraya" tenure, as in Government villages, and the old gardens on reduced shist or by converting payment of guttige in areca, into money. During recent years they have also been making agricultural loans to deserving garden-owners at a low rate of interest on the security of their immoveable property. Cocoanut trees are chiefly to be found here and there in and about Sringeri and rarely in other parts of the Jahgir. Pepper vines are cultivated on a small scale almost in every garden. The pest of supari gardens, Kole Roga or rot, has made its appearance in some parts of the Jahgir, causing great loss to several garden-owners. By alternate rain and sunshine the rot increases. The only remedy now resorted to is an external one, *i. e.*, by covering the bunches of nuts by kottes as soon as the disease appears in some corner of the garden or in the vicinity. A successful scientific preventive, if found, would be a blessing to the malnad. The average price of good supari is Rs. 7 per maund. The supari gardens take about 15 years from start to yield. A garden is divided into three parts for purposes of maintenance and renewal:—

(1) loosening the ground round the roots and removing the surface roots,
(2) manuring and spreading bundles of leaves round the trees, &.,
(3) throwing fresh earth over the leaves.

The three processes take place every year by rotation. A beginning for the introduction of coffee cultivation into the Jahgir has been made. A heggaday has opened a small plantation in the western side of the taluk in Cholarmane. The plants are 2 to 3 years old. There is good shade and water. The plants are promising. There are two others, smaller, being well worked. If the experiment succeeds, in spite of the excessive rainfall, in the Jahgir, there is room for its extension in other parts.

14. *Forests.*—There is a considerable area of forest, though it does not contain very big or valuable timber trees. It does not yield much revenue. The Jahgir authorities have been trying their best to conserve them by issuing licenses for cutting timber and levying a small seigniorage. Each garden, or wet "kog" has its own "soppinbetta" for the supply of leaf manure. The large quantities of fuel annually consumed in and about Sringeri is a heavy drain on the forests close by.

15. *Manure.*—The manure used for wet crops consists of cattle-droppings, leaves, dry and green, and, for gardens, a mould prepared from leaves and cattle-droppings by stall feeding, which is as follows:—

Bundles of leaves from soppinbetta are taken and spread out thick in cattle-sheds. The cattle have to tread on these to lie and feed on them. Their droppings get mixed up with the trodden leaves. When the whole becomes consistant, it is removed into pits and stored there. The supply of leaves is renewed and the process repeated. This mould is specially valued for areca gardens.

16. *Roads.*—The Jahgir is covered with a net work of roads maintained by the Jahgir authorities. They are maintained on the whole, in good condition, though in some places they require to be brought up to standard. Sringeri is the centre where five roads meet; one running north connects it with Harihar-pur or Koppa and another running north-west connects it with Agumbi *via* Begar, and further to Udapi and Mangalore. A road running east connects it

with Sollebail. One, west, connects it with Kigga, and another, south-west, with Nemmar. The opening of the bridge at Hariharpur has made journey to and from Sringeri more frequent and less risky during the rains. The Janjal at Norwe is considered risky for loaded carts. When the Tadasa bridge, which is fast approaching completion, is thrown open, the cart traffic will increase. Besides the above, there are cart-tracks or roughly made roads connecting main roads with villages where sowcars and supari growers reside. There is also a cart-track recently opened out connecting Koppa and Begar roads, tapping Kelavalli, Ambalur, Malalkoppa, Halaka and other places.

17. *Markets.*—A weekly fair on Mondays is held in Sringeri during the fair whether, merchants from Tarikere, Shimoga and other places bringing grain and other food stuffs. This is not very largely attended.

The principal market for the disposal of supari is Birur and, to some extent, Bellary, where the nuts are assorted and exported by agents to Bangalore, Vellore, Madras and other places. The carts which come to take supari from the Jahgir bring the necessary articles of consumption, cloths, &c., from Birur, Tarikere, Shimoga and other places, for the merchants who export supari for their constituents. Large purchasers of food stuffs also resort to Koppa sante on Sundays, which has become, of late years, very important on account of the large coffee estates in and about Koppa.

18. *Festivals.*—The Navaratri Mahotsavam is the most important festival, held in Sringeri for 15 days. This is attended by more than 10,000 people. Merchants from outside make use of this occasion to sell vessels, cloths and other articles. The car-festival of Mallikarjunaswami, held the next day after Sivaratri, Sardamma's, Vidyashankar's car-festivals are also attended by about 3,000 people.

19. *Manufactures.*—There is nothing in the shape of manufactures.

20. *Exports.*—The exports are supari to Birur and Bellary for being sent to Vellore, Bangalore, Madras and other trade centres, cardamon to Haveri, pepper to Birur and Mangalore. No reliable statistics are available. Between 25,000 to 32,000 maunds of areca are yearly exported. The principal imports are rice, salt, togari, hesaru, sugar, chillies, ghee, oils and other food stuffs, kerosine oil, piece-goods, country-made cloths, iron and tobacco. Sringeri is a centre for the trade of piece goods and country-made "sadis" and "dhoties" to the extent of Rs. 50,000 annually. The Matt is the largest consumer of foodstuffs and cloths.

21. *Weights and Measures.*—The khandi measures consists of 20 kolagas of $2\frac{1}{2}$ seers each, *i. e.*, 50 seers, but the gadde khandi when delivered in the villages is 5 seers more, to cover cooly or carriage hire to Sringeri. If the grain is delivered in Sringeri the excess quantity is not paid. The weights and seers in use are the same as those in the other taluks. A maund of supari, pepper, chillies, &c., consists of 44 seers of 24 tolas each, oil and ghee $46\frac{1}{2}$ seers. In the retail trade the lesser maund of 40 seers is also in vogue.

22. *Labour, Wages, &c.*—The resident labour population being insufficient for the wants of the Jahgir, coolies from below the Western Ghats come up for the season between November and May. They are mostly employed by garden owners.

As soon as the rains set in they return to their native places to attend to their agricultural pursuits there. Their wages vary from 4 to 5 annas a day for a male and from 2 to 3 annas for a female, in cash. The male coolies are also paid one seer of rice and 2 to 3 annas a day. During the rainy season the coolies who have to work in harvesting supari or for capping the bunches of nuts when kole roga threatens, make much more. Masons and carpenters make from Re. 1 to Rs. 1-4-0 a day. A remnant of the old classes of slaves has been left in the Jahgir. They are chiefly of two varieties. The nela alu (attached to land) who changes with his land-lord. The mane alu (attached to houses) who changes with his master. About 400 of them may be found scattered over the

Jahgir, the largest number being found on the Kuttigode side with Kuthgode Singa Bhatta. They are daily paid 2½ seers of paddy with salt, &c., besides an annual supply of clothing, consisting of 2 hachadas, 2 kamblies, 1 rumalu and 2 sadies. Their lives are not now so hard as they once were. Many of them know that they can get their full liberty by crossing the borders of the Jahgir or by taking employment in coffee estates. When their masters have no work to give them they work outside and earn higher wages. The time is not far off when they will obtain completely the position of ordinary laborers. On account of imported labor, among other causes, the Jahgir imports rice though paddy is a staple crop.

23. *Tenure*: *Wet Lands.*—The warg tenure prevails throughout the Jahgir for wet lands. The gardens were, by metes and bounds, put in possession of the inamdars or the Matt, by Shivappa Naik in his settlement of 1651 A. D. The wet lands were put in possession of the Heggade wargdars. In many cases the warg lands are scattered over more than one village. The wargs are not generally what they were at the time of Shivappa Naik's settlement. By subdivision, sale and extinction of families, they have changed hands. There is a Brahmin wargdar, Kuthgode Krishna Bhatta *bin* Singa Bhatta, whose extensive warg is scattered over 30 villages, and has swallowed up many a minor warg. Each warg has its own soppinabetta attached for taking vegetable manure, the gardens having also Hauklu and Hadya attached. Sub-letting of warg lands is rarely resorted to. When wargdars are not able to cultivate themselves or by their servants, they sub-let their wet lands for grain payment, which is generally one khandi higher than that shown in the Matt accounts.

*Gardens.*—The tenants or genidars are of two kinds:—

1 Kadim or Mula genidars.

2 Chargenidars from year to year or for a fixed number of years.

For every 100 dayas of supari garden brought up to standard for yielding, the guttige in the Jahgir varies from 2 to 2¼ maunds, the gross yield being from 4 to 6 maunds of supari. The land-lord's share, according to Shivappa Naik's settlement, is ⅓rd, the middleman's or the genidar's ⅓rd and the remaining ⅓rd for the up-keep and maintenance of the garden in an efficient state. The shist gardens paying a fixed money assessment to the Matt or inamdars are highly valued on account of the fixity of tenure and the good profit they yield. On account of the rigidity with which the minor inamdars enforced the payment of the guttige in kind, when the price of areca was not so high as it is now, they held out a premium for the "Mul-Genidars" to spend less on the up-keep of the garden and to gradually let them run to ruin, so that the terms might be relaxed in their favor. Several inam gardens of absent land-lords have been in ruin.

24. *Remuneration of Village Servants.*—There are two shanbhogs for the whole Jahgir; two pals or hoblis being in charge of each. They are paid by the Jahgir at the rate of Rs. 12 a month. There are seven patels for the whole Jahgir, who, in all, are paid Rs. 247 per annum. Some of these patels are also Heggades with Umbli Inams. There are also Hebbars with Umbli Inams. They have got specific functions to perform on ceremonial occasions. The shanbhogs get no fees from raiyats. There are no totis or talwars as in the other parts of the malnad, though some of the patels maintain them out of their remuneration.

25. *Rates of Assessment*: *Wet Lands.*—The rates in force on wet lands are said to be based on Shivappa Naik's settlement, and are calculated in kind as gaddi in khandis. The Matt authorities have converted, in special cases, the paddy into money payment. Even in such cases both the gaddi and its money equivalent are given. According to Shivappa Naik's settlement a varaha was the equivalent of ten khandis of paddy. The rates of gaddi vary from 2 to 8 khandis for a khandi of wet land (roughly equal to ½ an acre) the latter for double crops. The rates now prevailing vary from 2 to 6 khandis, both the maximum and minimum being found in a few villages. The assessment paid in kind has been found to vary from 3 to 13 khandis for every acre, which at the

average price prevalent during the past few years, comes to Rs. 3-12-0 to Rs. 16 per acre. The average for the Jahgir may come to Rs. 5-8-0 or Rs. 6 per acre.

*Gardens.*—The rates for gardens vary from Rs. 29-8-2 (7 varahas 8 hanas) to Rs. 41-9-6 (11 varahas) for 1,000 dayas. According to the calculation now in force in the Jahgir, the equivalent of 1,000 dayas is $1\frac{2}{3}$rds acres, but 1,000 dayas may be taken as the equivalent of 2 acres so far as the Jahgir is concerned. The rate per acre will thus vary from Rs. 14-12-0 to Rs. 20-12-0. 500 dayas brought up to yielding standard on geni tenure pays a guttige of about 10 maunds, which comes to Rs. 70 at Rs. 7 a maund, the gross yield of the same garden varying from 20 to 30 maunds.

26. *Health.*—The people are generally healthy, though not free from the fever which prevails both after the set in of the first rains and its cessation.

27. *Areca Sowcars.*—As in the malnad taluks, the wargdars and the garden genidars are not free from the influence of the sowcars. The chief exporters of the areca from the Jahgir are a few sowcars, the most important of them being Brahmins. The areca-nut grown has to be weighed out in the grower's yard or in that of the sowcars. Here begins the first loss. The underlings of the sowcars who weigh out make the best of the bargain for their masters. Then if the nut contains more of "Bettay" or inferior nut than is allowed by mamool, the grower has a further loss in the price. After all the nut is exported and after the sales take place in Birur or Bellary, the sowcars fix a price styled "*shime dharne*" average (general) price, which is generally Rs. 2 or Rs. $2\frac{1}{2}$ less than that prevailing in Birur and other markets. After this price is fixed in March or April, credit is given to the growers and the account settled. As the grower gets his money advances for work, cloths, paddy, salt and other food-stuffs and as he is thus entirely dependent on the sowcar for his necessaries, the settlement of the accounts at the end of the year does not generally better his position. Several growers get thus entangled in the net of the sowcars and are at their tender mercy. I was glad to find in Sringeri Jahgir some Heggadays and some Brahmin growers of areca-nut, steering clear of the disadvantages of this sowcar-dealing. From the way in which the Agricultural Bank at Haradi Koppa has been reported to be working, the only remedy appears to be the establishment of an Agricultural Bank in Sringeri under the superintendence of the Agent of the Matt, and the Jahgir Amildar. The present Agent, Mr. Srikanta Sastri, is fully alive to his advantages. When I was there an attempt was made to start a Bank.

28. *Places of Interest.*—The antiquity and historic fame of Sringeri are well known. Here was the hermitage of Vibhandakarishi who is said to have worshipped Mallikarjunaswami, and here was the birth-place of his son, Rishi Sringa, a sage adorned with horns, and a celebrated character in the Ramayana. How he was allured away first to Narve by damsels sent from the court of Anga and thence to the capital under the belief that his arrival there would avert draught and famine and how heavy rains set in as soon as he commenced his journey, and other leading events of Ramayana are treasured up, and often narrated by the people of the Jaghir and the neighbouring villages. When Sardamma's throne was established at Sringeri, no small addition was made to its fame. As head-quarters of the Jagat Guru its historical associations are kept up. During the Navaratri Utsavam, when Sardamma is believed to rule there with all her powers, Sringeri is visited by more than 10,000 people. Most of them are sumptuously fed for a fortnight. They are also presented with money and cloths. The Mallikarjunaswami car-festival which takes place the day after Sivaratri, the Karthik festival of the same, and the car-festival of Sri Sardamma and of Vidya Shankara, are attended by 2,000 to 3,000 people from the surrounding villages of the Jahgir and Koppa taluk: Shankaracharlar left his converted disciple Mandana Misra, called Sureswaracharlar, in Sringeri, and is said to have ruled for nearly 800 years. His shrine is looked upon with great interest and reverence by his devotees. The temple founded by Vidyaranya in honor of his Guru Vidya Shankara is built of stone on a rock on a high terrace on the

banks of the Tunga not far from Sardamma's temple. This is a grand ornamental temple built after Chalukyan style. Though the carvings may not come up to the Halebid or Belur standard, they must have cost more labor and skill, as they are cut of rough stone. It was also intended as an observatory. If the sun's rays are allowed to pass through a chink in the door-way on every "Sankramana" day, they are said to fall on the 12 ornamental pillars in the hall by turns. This temple was also intended as a safe place for securing jewels during times of trouble. The students of Yoga philosophy will find the different Asanams or postures carved out on the outside of the temple. The gods of the Hindu pantheon are also to be found there engraved. The fish in the river adjoining this temple, fed daily by the Matt, are an object of great interest to visitors. The recently opened Narasimhavana, well laid out on the other side of the river, with many a fruit tree, is a place of great interest as the residence of His Holiness during the greater part of the year. The well-built Jain basti endowed by the Jahgir with land inams is another object of interest.

In Sringeri there are more than 100 minor temples endowed, most of them with dwelling houses for Brahmins around.

The other places of interest are—

Vidya Shankara's temple in Simhagiri Kerode, not far from the Matt, is noted as having been the place where Vidy Shankara sat for meditation.

Vidyaranyapur Agrahar, founded in honor of the celebrated Vidyaranyaswami, contains Sadasiva temple founded by Sadasiva Naik and others.

The Narasimhapura and Sachidanandapura Agrahars were also built on the banks of the Tunga; the former became "Bechirakh" more than a century ago, the latter but recently. The temples therein endowed are maintained.

Vycuntapur Agrahar, an elevated spot about 100 feet high on the banks of the Tunga, contains four temples with a row of houses on both sides. There is a flight of steps of laterite stone to the river, recently built. The people are all Vydics. They are healthy.

Anegunda Agrahar with its two temples, a mile from Sringeri on the Narve side, is maintained in very good condition.

Yelamoge opposite to Sringeri, the shrine of Thilabhandava Rishi, Chadarvalli Someswaraswami, Halandur Mallikarjunaswami, Kamadi Mallikarjunaswami, Kottadi Mallikarjunaswami, Umamaheswaradevaru, Kalkuly Niraheswara are other important temples outside Sringeri. I refrain from going into details regarding several places of historical or religious interest in the Jahgir as being beyond the scope of this report.

29. The net-work of roads connecting Sringeri with important places around, the opening out of that part of the country by the railway line from Bangalore to Harihar, the bridge at Hariharpur, and the expansion of coffee industry have had their own beneficent effect in adding to the material prosperity of the Jahgir, by having its share in the rise and equalisation of prices, and in attracting a larger number of pilgrims, by making their journeys less tedious and more secure. The opening of the Shimoga-Birur Railway and of the bridge at Tadasa, and the establishment of an Agricultural Bank will, at no distant date, add further to its material prosperity and importance. The time is not far off when areca exporters and growers will escape the inconvenience and loss caused by the expensive Birur and Bellary agents, by having direct dealings with outside merchants at centres of consumption. Should the mining resources of the Jahgir attract foreign capital, that special industry will bring about no small change in its condition.

I. Wet Lands.

The Survey Superintendent, in his report to Government regarding the proposed introduction of Survey Settlement into the Sringeri Jahgir, states, with regard to wet lands, that according to survey, the total area under cultivation including inams is 4,536 acres, that out of this area an extent of only 2,000

acres will be set apart for the allocation of paddy inams, that the rest, *viz.*, 2,536 acres, will exclusively go to the Jahgirdar, that the assessment on this total area now estimated by him is Rs. 10,670, which gives an average rate of Rs. 4-3-4 per acre, and that he has given a higher maximum rate here than for the Koppa taluk which surrounds the Jahgir. He further states that his proposed settlement will give the Jahgirdar Rs. 3,470 more than what is now realised from the wet lands, *viz.*, 7,200.

2. The Survey Superintendent appears to hold the opinion that the rates of assessment under Sivappa Naik's Settlement of 1651 were very excessive and that the revenue of the Jahgir under the proposed settlement will exceed the present collections. But the following considerations will show that this opinion is not quite supported by facts.

3. The rates of assessment under the settlement introduced by Sivappa Naik in 1651 were by no means excessive or heavy at that age. As the grains were then very cheap and money very dear, it was easy for the raiyats to pay rent in kind. Therefore, the assessment was fixed in paddy varying from 3 to 8 khandis per khandi-bijavari of land, according to the fertility of the soil and the conveniences of irrigation. In order to ascertain the beriz assessment of wet lands, Sivappa Naik seems to have adopted a standard rate of ten khandis of paddy as equivalent to a pagoda of Rs. 3-12-5 in accordance with the market rate prevailing at the time and settled the Inams accordingly. Since then the Wargdars have been paying rent to the Jahgirdar as well as the Inamdars at the rates of assessment fixed at the settlement. Owing to the construction of roads, the development of trade and the consequent export of grain, the price of paddy has gradually increased during the last quarter of a century from the original rate of ten khandis to two-and-a half khandis per pagoda. The Wargdars began to complain that they would sustain great loss by paying rent in the shape of paddy and to request that the grain assessment should be converted into money assessment at the standard rate above referred to, *viz.*, ten khandis per pagoda. If the Wargdars had asked for conversion according to the prevailing market value, money assessment would have been introduced throughout the Jahgir long ago. But as their contention was purely selfish their, request was not heeded, and the assessment in kind continues to be collected. But in some cases, owing chiefly to stubbornness on the part of the Wargdars and also to other causes, the benefit of money assessment was given; to the great loss of the Jahgirdar, by adopting the old rate of ten khandis per pagoda. Such of the Wargdars who did not attain their object contrived to keep their lands waste and raised objections to pay the old assessment. Some twenty years back when the system of keeping Chittas and Pahanis was introduced into the Jahgir, the Jahgir authorities, with the object of pacifying the Wargdars, allowed them to enjoy rent-free some small portions of their wargas as beriz-baki, the old assessment continuing to be levied on the remaining portion.

4. In Malnad where there is incessant rain for four or five months in the year, wet cultivation is neither a very laborious nor a costly process. The only labor for the raiyat is to plough the lands and sow the seeds in the rainy season. Then nature will take care of the crops. The out-turn varies from 8 to 25 times the amount of seed sown. The wet crops in malnad are not known to have failed at any time. The price of grain has been steadily increasing. Out of the rates adopted at Sivappa Naik's settlement, those that are in force are 6, 5, 4 and 3 khandis of paddy for one khandi of land. Taking roughly one kandi-bijavari of land to be equal to half an acre as estimated by Mr. K. Ramaswamaiengar, Special Assistant Superintendent, the present assessment on land paying rent at five khandis will be Rs. 11-4-0 per acre (at the average price adopted by the Survey Superintendent, *viz.*, Rs. 1-2-0 per khandi), that of land paying at four khandis, Rs 9, and that of land paying at three khandis Rs. 6-12-0. Leaving aside the rate of six khandis of paddy to one khandi of wet land which is levied only on a small extent, the average of other rates amounts to Rs. 9 per acre. Even if this rate of Rs. 9 per acre be now imposed, there will hardly be room for the Wargdars to complain that the assessment is out of proportion to the out-turn of their lands.

5. The average rate of Rs. 4-3-4 per acre proposed by the Survey Superintendent will not give the increase of Rs. 3,470 on the present realizations to the Jahgirdar. For the lands allowed rent-free to the Wargdars as beriz-baki referred to above, have been charged since 1898-99 with assessment which is being collected, and on this account a sum of Rs. 1,000 in round numbers has to be added to the total of the actual collections. Therefore the increase from the proposed settlement would be only Rs. 2,470. Even this increase would be possible in case only 2,000 acres would suffice for the allocation of paddy inams. If, on the contrary, larger extent would be required for that purpose, the Jahgirdar will sustain a great loss. The Survey Superintendent expresses his opinion in para 39 of his letter to Government that the Jahgirdar will gain 1,000 acres by allocation of inams, which is believed to be most probable. For these reasons the Jahgirdar requests that the average rate of assessment on wet lands may be raised from Rs. 4-3-4 to Rs. 6-0-0. The raiyat has no reasonable objection to this rate. He will not have to pay less to Minor Inamdars on their lands. The Survey Superintendent has fixed upon the price of paddy at Rs. 1-2-0 per khandi; and has accordingly made his calculations in striking the average rate of assessment on wet lands. The actual receipts of the Jahgir for the past twelve years were also calculated at the same rate. This rate has given him an average of Rs. 4-3-4 per acre. The Jahgirdar begs leave to state that this price of paddy, *viz.*, Rs. 1-2 0 per khandi, is very low, as observed by the Superintendent himself in para 56 of his letter. The present market value of the paddy is not less than Rs. 1-8-0 per khandi. The average price of rice for the past 19 years, as shown in para 43 of the above letter, comes to 10 seers a rupee. At this rate the price of paddy per khandi comes to about Rs. 1-12-0. So Rs. 1-5-0 may not be a high price per khandi; calculating upon this latter price, the money equivalent of the Jahgir and inam paddy comes to Rs. 26,000 in round numbers. This amount, if distributed even over the 4,536 acres found by survey, will give an average of Rs. 5-11-8 per acre.

## II. Garden Lands.

6. The Survey Superintendent in paras 45, 46 and 48 of his letter to the Government, states that the Matt garden lands measure 1,115 acres on which he has proposed to fix an assessment of Rs. 12,799,* that this assessment gives an average of Rs. 11-7-8 per acre which would be Rs. 1-11-10 per acre more than the present average, *viz.*, Rs. 9-11-10, seeing that the present collections amount to Rs. 10,857, that though he was inclined to propose a somewhat higher maximum rate, he could not do so having been obliged to adopt the rate of Rs. 15 per acre, as that was the rate fixed for the Koppa taluk in Government Proceedings No. 1888-90—R. F. 49-92, dated 19th August 1896.

7. The Jahgirdar considers he can reasonably expect higher rates on the garden lands than those now proposed by the Superintendent of Survey. The total area of garden lands now under cultivation according to the accounts based on the settlement of 1,651 is 324,810 dayas. Some of these lands have been charged with a rent at 22½ maunds of nut per 1,000 dayas and others with a money assessment varying from Rs. 29-8-2 (7 varahas and 8 hanas) to Rs. 41-9-6 (11 varahas). As the price of arecanut rose gradually, the rent in kind or most of the lands was converted into money assessment at the old rates instead of at the prevailing market rates. The rest of the lands still pay rent in kind at the original rate of 22½ maunds per 1,000 dayas. The total collections from the garden lands under cultivation, excluding those held on *shraya* tenure but including the price, at the present market value, of 450 maunds of nut levied as rent in kind, is Rs. 10,857. This amount must be considered to have been levied only on the extent of 324,810 dayas calculated on the basis of the settlement of 1651. Adopting the standard of conversion given by Mr. Ramaswamaiengar, *viz.*, 500 dayas per acre, 324,810 dayas will be equal to 649 acres. Now the amount of Rs. 10,857 levied on 649 acres gives an average rate of Rs. 16-11-3 per acre. The average rate proposed by the Superintendent is only Rs. 11-7-8. If this rate be sanctioned there will be a loss of

* The total is wrongly given as 12,801.

Rs. 5-3-7 per acre. The Superintendent holding the opinion that the total amount of Rs. 10,857 is collected on the survey area of 1,115 acres, shows an increase of Rs. 1-11-10 in the average rate, and of Rs. 1,944 in the total garden revenue. But if the assessment of lands held on shraya tenure, which have been omitted by the Superintendent, be added to the present collections the increase under the proposed settlement would be only Rs. 536. The present collections of Rs. 10,857, it must be noted, is the assessment of 3,24,810 dayas equivalent to 649 acres, and not the survey area of 1,115 acres, as the difference in area is due to extensive clandestine encroachments by gardeners.

8. The accounts based upon Sivappa Naik's settlement of 1651 show that the total area of Matt lands under cultivation is 3,24,810 dayas and that of inam lands 3,26,489 dayas. But at survey, the inam lands have measured only 726 acres, whereas the Matt lands 1,115 acres. If the maji and survey extents of the inam lands be compared, Mr. Ramaswamaiengar's rate of conversion, *viz.*, 500 dayas per acre, appears to be approximately correct. Therefore the excess area of 466 acres found at survey in the Matt lands must be considered as encroachments since 1651. As the Wargdars have been enjoying the benefit of the lands which they have gradually encroached upon for the last 250 years, it may not be unfair to ask that the present collections should be considered to be on 649 acres only and that the 1,115 acres found by survey should be assessed at rates not much lower than those at which assessment is levied till now on 649 acres.

9. The gradual increase in the value of garden lands has led to large extension of garden cultivation. The excess area of 466 acres found by survey cannot be considered to be too large an extent to be encroached upon during the 250 years which have elapsed since the settlement. For the gardens are generally situated in valleys at the foot of hillocks. As there is a practice of putting fresh earth to the root of every arecanut tree every year and as it is much easier for the raiyat to dig out the required fresh earth in the adjoining hillocks than to bring it from a distance, fresh lands would gradually be added on to the gardens, even if the raiyats did not wilfully want to make any encroachment, and the gardens would naturally be extended. If any person wishes to extend his gardens, he can accomplish his wish very easily. During the rainy season when the incessant rain for four or five months will form water courses at the foot of every hillock, one can at a very small cost cut down the sides of the hillocks making the loose earth to be washed away, and thus get level land for extending garden cultivation. Many have extended their gardens in this manner. This is only possible in malnad where the heavy rains and the isolation of villages and cultivated lands amidst hillocks and waste lands give every facility to the raiyat to extend his lands just as he likes. Besides, the raiyats knew full well that if they extended the Matt lands, they would enjoy the entire benefit of the extension. For these reasons the raiyats have, during the 250 years since the last settlement of Sivappa Naik, brought 466 additional acres under garden cultivation, and paying only the rent that was fixed at the settlement on the original extent, have been enjoying the full benefit of these lands. But the inam garden lands having been defined and put in the possession of inamdars at the time of settlement, and the inamdars being Brahmins who do not cultivate their lands but only lease them to raiyats, there was no facility for the extension of these lands by the inamdars. Nor was there any inducement for the cultivators to extend these lands, as they knew that they could be ousted by the inamdars at any time and that therefore they were not sure of enjoying the benefit of their toils. Of late years, some of the raiyats have obtained mulgeni or permanent lease of some inam lands from the inamdars, and it is expected that such lands have shown greater excess at survey than those over which the inamdars exercise their full rights rigidly. This is another fact to show that the excess area of 466 acres found in the Matt lands is nothing but encroachment. Therefore it is but just to ask that the extent of 1,115 acres should be assessed at the average rate of Rs. 16-11-3 per acre as explained in paras 7 above.

10. In this Jahgir, the out-turn of 1,000 dayas varies from 40 to 100 maunds of nut. But the extent of gardens yielding the maximum rate of 100 maunds is very small. Most of the lands yield at the rate of 50 or 60 maunds. The average may be very fairly taken at 50 maunds per 1,000 dayas. At this rate two acres yield 50 maunds. The present market value of nut is Rs. 8 per maund. Even if we take a low rate of Rs. 6, the income would be Rs. 300 per two acres or Rs. 150 per acre. The total cost to the raiyat on account of cultivation and preparation of nuts cannot exceed Rs. 75 per acre. Even if he pays the rate of Rs. 16-11-3, the raiyat will undoubtedly have a net income of Rs. 58 per acre. He will have still greater income as the price of nut is high.

11. The reduced rate of garden assessment allowed to the Koppa taluk by Government in 1896 was in consideration of the higher rates the raiyat paid since the Survey Settlement in 1879, The Jahgirdar begs to say that if the Sringeri Jahgir was settled soon after it was surveyed in 1890, the average rate of assessment on garden lands would have been not less than Rs. 17 or Rs. 18, which was the rate then prevailing in the Koppa taluk.

12. If taking these facts into their kind consideration, Government be graciously pleased to sanction the average rate of Rs. 15 per acre, the Jahgirdar will not sustain a loss and at the same time the raiyats too will be benefited. Those that have been paying rent in kind will rejoice as if their lands had been made rent free.

As Mr. Ramaswamaiengar has dwelt at some length on the condition of agriculture and commerce in the Jahgir, it is unnecessary to say anything about it here. The consideration of the said condition too will show that the rate asked for is not excessive.

(4.) *Letter No. 1100, dated 21st February 1900, from the Deputy Commissioner, Kadur district, to the Superintendent of Revenue Survey in Mysore.*

I beg to acknowledge the receipt of your letter No. 466 of the 21st December 1899, forwarding a copy of your letter No. 465, of the same, date to the Secretary to the Government of Mysore in the Revenue and General Departments, regarding the settlement of the Sringeri Jahgir.

2. I had forwarded the whole of the papers to the Agent of the Sringeri Matt with a request that they might be explained to His Holiness the Jagadguru and that I might be favored with His Holiness' opinion about the rates proposed by you.

3. The Agent has, with his letter of the 30th January 1900, now returned them to me with a memo containing His Holiness' observations and opinions.

4. I herewith forward the said memo containing His Holiness' opinion.

5. It will be seen from the memo that the rates proposed are not quite accepted by reason of their being lower than those now obtaining. The present rates were settled several hundred years ago and they have ever been in adoption.

6. At present 6 khandis of paddy are given for every khandi of 1st class land given out for cultivation, 5 khandis for every khandi of 2nd class land, 4 khandis for every khandi of 3rd class land and 3 khandis for every khandi of 4th class land (*vide* para 4 of the said memo). First class lands are very few. So leaving out the 1st class rate, the average rate for each khandi of the 2nd, 3rd and 4th class lands, is 4 khandis of paddy. A khandi of land is equal to half an acre, as estimated by your Assistant Mr. K. Ramaswamaiengar. Therefore the present average rate per acre of land is 8 khandis of paddy. Even taking the lowest rate of Rs. 1-2-0 per khandi, as suggested by you in para 37 of your report to Government, the present rate per acre is Rs. 9. But the average rate proposed by you is Rs. 4-3-1. I am therefore of humble opinion

that you may safely enhance it. The Jahgirdar suggests an average rate of Rs. 6, but considering all the circumstances of the case, an average rate of Rs. 5-4-0 seems to me to be reasonable. So much for wet lands.

7. Now in regard to garden lands. As per settlement now in force, $2\frac{1}{4}$ maunds of arecanut are given for every 100 dayams. As per para 4 of your report to Government, 500 dayams make an acre. So, for an acre, $11\frac{1}{4}$ maunds of nut are now given. You estimate a maund of nut at Rs. 8 (*vide* para 37 of your report to Government). Therefore the present rate per acre comes to Rs. 90. The average yield per acre in that part is said to be 25 maunds per acre (*vide* para 10 of the Matt Agent's memo above referred to). At Rs. 8 per maund the average income per acre comes to Rs. 200. The total cost to the raiyat on account of cultivation and preparation cannot, it is stated in para 10 of the said memo, exceed Rs. 75 per acre. You propose an average rate of Rs. 11-7-8 per acre. The Inamdar asks for an average rate of Rs. 15. I humbly think that this point also deserves your reconsideration, as the rate asked for does not seem to be excessive in the face of the facts set forth above. At least the mean average rate of Rs. 13-8-0 may perhaps commend itself to your consideration.

8. I have not gone into details in this letter as I have explained to you everything in person and as the Agent's memo containing His Holiness' opinion is replete with information and you have been pleased to remark that it is excellent throughout and that you have little to say against its arguments. But I may perhaps mention that I have brought to your notice that in calculating the present revenue of the Jahgir the tax recently * imposed on wet waste lands in holding, which amounts to Rs. 1,000 in round figure, has been omitted as also the † kandayam of the garden lands let out on shraya tenure. Further, the amount of the potgi that has to be paid to shanbhogs and patels after the settlement, namely, Rs. 1,200 (*vide* para 54 of your letter to Government), as to be deducted out of the net increase of Rs. 5,442 that you anticipate. If these three items are subtracted, the anticipated increase will dwindle down considerably; and even the small amount that may remain is, I fancy, the assessment on the lands that have hitherto been under clandestine cultivation. If this casual increase be left out of consideration and the results by applying the present and the proposed rates on the lands in holding as recorded in the registers be taken, they will show, I fear, a fall in revenue by the proposed settlement.

* *Vide* para 5 of the Memo above referred to.

† *Vide* latter part of para 7 of the said Memo.

---

*5. Letter No. 739, dated 10th April 1900, from the Superintendent of Revenue Survey in Mysore, to the Secretary to the Government of Mysore, General and Revenue Departments.*

I have the honor to submit the marginally noted correspondence on the subject of the revision of the assessment of the Sringeri Jahgir situated in the Koppa taluk of the Kadur district.

Printed Report on proposed settlement with its enclosures of Agent's Memo.
Deputy Commissioner's letter No. 1100 of 21st February 1900.

2. The correspondence ends with the Deputy Commissioner's letter No. 1100 of the 21st instant, accompanied by a Memo by the Agent of the Matt, which is in itself important and at the same time gives expression to the views of His Holiness the Jagadguru on the proposed settlement, and is therefore worthy of careful consideration. The Memo is in fact a very able one and, considering the circumstances, a very temperate one, but it would be unreasonable to expect that it should hold up to view both sides of the question.

3. Before considering the suggestion so strongly urged by the Agent and supported by the Deputy Commissioner to increase my proposed rates, I must dispose of the insinuation that my rates may possibly result in actual loss of revenue. The question admits of positive proof and

Agent's para 2.
Dy. Commissioner's para 8.

should not have been raised in suggestive form. Thus the estimated gain, as a result of the Settlement, being Rs. 5,442, is liable to diminution from the following causes :—

Para 54 of Report.

| | Rs. |
|---|---|
| (*a*) Amount being collected since 1899-1900 as "Berij baki" but not reported to the Survey Superintendent (see para 5 of Agent's Memo) ... ... ... ... ... | 1,000 |
| (*b*) Amount required for Potgi (see para 53 of report) ... ... | 1,200 |
| (*c*) Allowance for possible error in estimating for purposes of conversion, the khandi of paddy at Rs. 1-2-0 (see para 55 of Report)... | 800 |
| (*d*) Amount foregone annually until completion of the "Shraya" period for gardens (see para 7 of Agent's Memo)... ... | 1,600 |
| Total ... | 3,600 |

Thus, under the darkest anticipations, and even after providing for so useful a measure as the remuneration of patels and shanbhogs, there must be a gain of about Rs. 1,000 and perhaps more, but at all events there cannot be any loss.

4. I will not protract this correspondence unnecessarily, but at once admit that I entirely concur in almost all that has been stated in the Agent's Memo, and by the Deputy Commissioner, regarding the circumstances and condition of the Jahgir.

5. It is only when I find both the Agent and the Deputy Commissioner seeking to make the high, but purely nominal, wet and garden rates, said to be at present in force, a determining factor and a plea for equally or nearly as high rates under the proposed settlement, that I feel myself quite unable to concur. These rates of Sivappa Naik's which (see Agent's para 2), I am supposed wrongly to regard as high are, for wet land, according to the class, and even at the easy rate of conversion adopted by me, *viz.*, Rs. 1-2-0 per khandi of paddy, Rs. 11-4-0, Rs. 9, and Rs. 6-4-0 per acre. These rates of Sivappa Naik's are said to have been very moderate, as no doubt they were intrinsically but not relatively, for, if cheapness of grain in those days made the rates in kind of small money value the same rule holds good with reference to the gross produce.

Agent's para 4.
Dy. Commissioner's para 6.

6. I certainly regard Sivappa Naik's wet rates as very high and the best proof of this is that they have never been levied. They are purely nominal, that is to say, so far as general applicability is concerned. Directly we apply the test of the newly ascertained actual area it is found that this supposed average of Rs. 9 per acre goes down to Rs. 4-13-1 (see para 36 of Report), calculated on the whole of the payments by the Wargdars to both Matt and minor Inamdars; and, further, when this average rate is apportioned, so far as our information will admit on Inam and Matt payments separately, it is found that the Minor Inamdars have been receiving Rs. 7-5-2 per acre and the Matt only Rs. 2-13-5 per acre, a very different rate from that of Rs. 9 for which credit is taken. I can of course make this calculation only upon what we know will be the area of the allocated Inam, *viz.*, 2,000 acres and of the Matt land 2,536 acres, the payments hitherto, respectively, being Rs. 14,649 and Rs. 7,200. It strikes me then as very dangerous, on such mistaken conclusions, to recommend an average rate of Rs. 6 for wet land and to declare that even Rs. 9 would not hurt the Wargdar (see para 4 of Agent's Memo). The average of Rs. 7-5-2 paid to the Minor Inamdars is, I must admit, very high and denotes great paying capability, but even that high rate does not come near the supposed average of Rs. 9, and we must remember that the relations between the Wargdars and the Minor Inamdars are very different from those which subsist, or could subsist, between the Wargdars and Government, in this case the Matt. I have no doubt in my mind that, as I stated at para 41 of my Report, the high rate paid by the Wargdars to the minor Inamdars has been at the expense of the Matt.

7. Although I have been obliged to point out what appears to me to be erroneous reasoning, I am quite prepared to admit that there is a great deal in the Agent's Memo, and in the Deputy Commissioner's letter, which will justify a prudent raising of the rates as first proposed in my report. Those rates follow the safe guidance of past experience but they are very moderate. When I proposed them I was under the impression that what the Jahgirdar desired was the settlement of the claims of the minor Inamdars, chiefly, and the establishment, generally, of order and system, and that so long as there was no loss of revenue, as a result of the settlement, and I have already shown there could be no loss, the neighbouring rates already adopted in Government villages might safely be followed.

8. I think that it would be unfair, however, to force upon the Jahgirdar a too liberal policy which Government could perhaps afford but the Jahgirdar could not.

9. I have therefore set myself the question whether my rates as first proposed, compared with the rates adopted for the Koppa taluk 21 years ago, have been raised to the full extent justifiable by the rise in prices during that period. If they have not, then I think that they may be prudently raised to a point somewhat within that full extent.

10. The price of paddy may safely be said to have risen some 30 per cent since 1879, supari somewhat less. I do not think that any mistake can be made by adopting wet and garden rates about 30 per cent higher for wet land and about 20 per cent higher for garden land than the Koppa taluk rates. This will enable me to adopt, instead of the maximum rates proposed at para 45 of my report, the following:—

| | Rs. a. p. |
|---|---|
| Maximum wet rate ... .. ... | 7 0 0 |
| Do garden rate . . . | 18 0 0 |
| Do dry crop rate . . | 0 12 0 as before |

11. I will re-produce the principal statements in my report on the basis of these fresh proposals.

12. The statement at para 46 of my report, which shows the result of the proposed rates on the occupied land, now becomes as follows:—

| Class. | Villages. | Dry. | | | Wet. | | | Garden. | | | Total. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Acres. | Assesst. | Average rate. | Acres. | Assesst. | Average rate. | Acres. | Assesst. | Average rate. | Acres. | Assesst. | Average rate. |
| | | | Rs. | Rs a. p. | | Rs. | Rs. a. p. | | Rs, | Rs. a p | . | Rs, | Rs. a. p. |
| 1 | 253 | 48 | 28 | 0 9 4 | 4,536 | 21,332 | 4 11 3 | 1,115 | 15,106 | 13 8 9 | 5,699 | 36,466 | 6 6 5 |

13. The statement at para 49 of my Report being that of the area and assessment of the unoccupied land available for cultivation, becomes as below:—

| Class. | Villages. | Dry. | | | Wet. | | | Garden. | | | Total. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Acres. | Assessment. | Average rate. | Acres. | Assessment | Average rate | Acres. | Assessment | Average rate. | Acres. | Assessment. | Average rate. |
| | | | Rs. | Rs. a. p. | | Rs. | Rs. a. p. | | Rs. | Rs. a p. | | Rs. | Rs a. p. |
| 1 | 253 | 55 | 24 | 0 7 0 | 129 | 493 | 3 12 6 | 68 | 377 | 5 8 8 | 252 | 889 | 3 8 5 |

14. The statement of inam lands at para 50 of Report becomes:—

| Class. | Villages. | Dry. | | | Wet. | | | Garden. | | | Total. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Acres. | Assessment. | Average rate. | Acres. | Assessment. | Average rate. | Acres. | Assessment. | Average rate. | Acres. | Assessment. | Average rate. |
| | | | Rs. | Rs. a. p. | | Rs. | Rs. a. p. | | Rs. | Rs. a. p. | | Rs. | Rs. a. p. |
| 1 | 253 | 4 | 2 | 0 8 0 | 96 | 456 | 4 12 0 | 724 | 9,499 | 13 1 11 | 824 | 9,957 | 12 1 4 |

15. The proposed settlement will now affect the Matt (see para 48 of Report) financially, as follows:—

| Description. | Past collections. | By Survey. | | |
|---|---|---|---|---|
| | | Area. | Assessment. | Average rate. |
| | Rs. | | Rs. | Rs. a. p. |
| Dry ... ... ... ... | ..... | 48 | 28 | 0 9 6 |
| Wet ... ... ... ... | 7,200 | 2,536 | 11,927 | 4 11 3 |
| Garden ... ... ... ... | 10,857 | 1,115 | 15,106 | 13 8 9 |
| Total ... | 18,057 | 3,699 | 27,061 | 7 5 1 |

The above represents the whole of the land which will pay money assessment direct to the Matt. The inam gardens, 726 acres, held as inam, and 2,000 acres of wet land, which I calculate will be required to allocate in land the present inam of paddy payments, have been excluded from the above.

16. Instead of Rs. 5,442 as shown at paras 48 and 54 of Report, the gain as a result of the settlement will now be Rs. 9,004. Deduct the items shown at para 3 above, *viz.*, "Berij baki" Rs. 1,000, Potgi Rs. 1,200, allowance for possible error in conversion rate Rs. 800, and amount foregone on account of "shraya" Rs. 1,600—in all Rs. 3,600—and there is still a substantial gain of Rs. 5,404. I think that the Jahgirdar should be well satisfied with this settlement, but at all events the rates now proposed are as high as, as a Settlement Officer, I can possibly recommend, nor do I think that the Agent of the Matt or the Deputy Commissioner would wish to go higher, now that the fallacious character of Sivappa Naik's rates, upon which they built such weighty conclusions, has been demonstrated. These remarks will be well pointed by comparing the average wet rate now proposed, *viz.*, Rs. 4-11-3 per acre, with the average wet rate of the best group in the Koppa taluk, adjoining, which is only Rs. 2-11-11 per acre. The difference is justifiable partly by the rise in prices and partly by the superior quality of the Sringeri villages and consequent higher classification but although justifiable there is not much margin of safety left, Rs. 4-11-3 per acre being the highest average wet rate yet adopted in the district. I have no fear regarding the suitability of the rates on both wet and garden now finally revised, only I am not prepared to go any higher.

17. I append a fresh classwar statement in lieu of that first prepared and alluded to at para 59 of Report.

18. In conclusion I beg to solicit the sanction of Government to my rates as now finally proposed and at the same time to draw attention to the concluding para of my Report, which shows the measures necessary before the extremely difficult and complicated Settlement of the Minor Inams of the Jahgir, indeed, of the Jahgir itself, can be further proceeded with.

No. 8501-3 —R. F. 168-93, DATED BANGALORE, 22ND APRIL 1901.

ORDER THEREON—The first two of the communications read above give a descriptive account of the Jahgir for the revenue settlement of which by survey proposals are now submitted. The Jahgir, which has been divided into four hoblis consisting of 253 villages, is situated in the heart of the Koppa taluk. The river Tunga divides it almost into two equal divisions; and the whole tract lies within the malnad region. The chief products are rice and arecanut, the wet cultivation being dependent chiefly on rain and also on hill streams. Dry crops and coffee are raised only to a very limited extent.

2. The total area of the Jahgir is 44 square miles, or 27,620 acres as particularized below :—

| | | Acres. | Acres. |
|---|---|---|---|
| Occupied area | | | 5,699 |
| | Dry | 48 | |
| | Rice | 4,536 | |
| | Garden | 1,115 | |
| | Total | 5,699 | |
| Unoccupied area | | | 252 |
| Inam area | | | 824 |

The lands are mostly held in wargs, scattered in various places, and sometimes in different villages. The occupants of wet lands in these wargs generally make payments of rent in kind to minor Inamdars, and in kind or cash to the Matha. The inam lands have hitherto not been separated from the lands of the Matha; and so Government in their Proceedings No. 2263-70—R. F. 168-93, dated 11th September 1900, had to sanction rules for the allocation of inam lands for these paddy payments due to minor Inamdars.

3. The old collections and average rates on the occupied wet and garden lands were as follows, dry crop land having paid no assessment :—

| Extent of occupied wet lands. | Payments by Wargdar. | | Average rate. | Extent of occupied garden land. | Payments by Wargdar. | | Average rate |
|---|---|---|---|---|---|---|---|
| | To Matt. | To minor Inamdars. | | | To Matt. | To minor Inamdars. | |
| Acres. | Rs. | Rs. | Rs. a. p | Acres. | Rs. | Rs. | Rs. a. p. |
| 4,536 | 7,200 | 14,649 | 4 13 1 | 1,115 | 10,857 | Nil | 9 11 10 |

4. The maximum rates of assessment proposed for the Jahgir compare with those sanctioned for the Koppa taluk in 1879, as follows :—

| | Rates for the Jahgir. | Rates for the Koppa taluk. |
|---|---|---|
| | Rs. a. p. | Rs. a. p. |
| Dry | 0 12 0 | 0 12 0 |
| Wet | 7 0 0 | 5 8 0 |
| Garden | 18 0 0 | 18 0 0 |

The following is the result of the application of the above rates on 5,699 acres of occupied land referred to in para 2 above :—

| | Extent. | | Assessment. | | | Average rate. | | |
|---|---|---|---|---|---|---|---|---|
| | A. | g. | Rs. | a. | p | Rs. | a. | p. |
| Dry ... ... ... ... .. | 48 | 0 | 28 | 0 | 0 | 0 | 9 | 4 |
| Wet ... ... ... ... ... | 4,536 | 0 | 21,332 | 0 | 0 | 4 | 11 | 3 |
| Garden ... ... ... ... ... | 1,115 | 0 | 15,106 | 0 | 0 | 13 | 8 | 9 |
| Total ... | 5,699 | 0 | 36,466 | 0 | 0 | ..... | | |

About 2,000 out of 4,536 acres of occupied wet land are estimated to be required for allocation of land inams in lieu of paddy payments to minor Inamdars. Excluding this area from calculation, the proposed settlement will yield to the Sringeri Matha a gross revenue of Rs, 27,061 or Rs. 9,004 more than the amount realized according to the old rates on 3,699 acres of occupied land. Deducting Rs. 4,600 referred to in para 3 of the Survey Superintendent's Report No. 739, dated 10th April 1900, the net profit to the Matha amounts to Rs. 4,404, exclusive of local cess.

4. With the foregoing observations, sanction is accorded to the Survey Settlement of the Sringeri Jahgir and to the adoption of the rates of assessment recommended in the Survey Superintendent's letter No. 739, dated 10th April 1900.

5. With reference to para 60 of the Survey Superintendent's letter No. 465, dated 21st December 1899, his attention is invited to Government Proceedings No. 7304-13—R. F. 168 of 1893-94, dated 15th March 1901, sanctioning the modification of Rules VI and XV of the general Inam Rules of 1867 so far as they may be applicable to the Agrahar Inams in the Sringeri Jahgir.

Proceedings of Government No. 754-62—Ft. F. 125-95, dated the 22nd July 1899, on the subject of enumeration of sandal-wood trees in the State.

READ—

Letter No. 340—30, dated the 21st July 1900, from the Conservator of Forests in Mysore, transmitting the reports received from the Deputy Commissioners of districts together with his own remarks and proposals.

No. 8520-29—R. 3025, DATED BANGALORE, 24TH APRIL 1901.

ORDER THEREON—In the Government Proceedings read above, it was observed that the present system of enumerating sandal-wood trees was neither useful nor necessary and could not give accurate results. It was considered expedient to alter the procedure and to enter sandal trees in the yearly Pahani account (Village Form No. VII). The opinions which were called for from the Conservator of Forests and Deputy Commissioners of districts, being favorable to this view, Government has resolved in the Forest Department that the enumeration of sandal trees ordered in 1895, by Government Proceedings No. 1948 —Ft. 109, dated 15th August, be discontinued.

2. With a view to ensure the interests of Government in sandal trees standing in occupied lands, being duly protected, it is hereby directed that the number and description of all sandal trees standing in each assessed survey number of land be correctly entered in the Pahani from 1901-1902 under the head of "Remarks." Only those above three feet in height need be counted as such, and if any trees are dry, their number should be indicated.

3. The officers whose duty it is to test the accuracy of the Pahani account, will also direct their attention to the entries of sandal-wood trees and note whether such entries are made correctly or otherwise.

Letter No. 1742, dated the 26th November 1897, from the Senior Surgeon and Sanitary Commissioner with the Government of Mysore, suggesting that an official's fitness or unfitness for insurance should be made the test of his fitness or unfitness for entering the public service.

2. Letter No. 8997-2100, dated the 14th May 1898, from the Comptroller to the Government of Mysore, stating that ineligibility for insurance should not be connected with that for public service and suggesting that to avoid two Medical Examinations, one for admission into service and the other for Insurance, the official may be examined at the same time for both purposes.

3. Letter No. 24, dated the 24th June 1898, from the Secretary to the Mysore State Life Insurance Committee, submitting a resolution in favor of the Senior Surgeon's suggestion referred to above, passed by the Insurance Committee in their meeting held on the 28th June 1898.

No. 8326-65—FL. 823, DATED BANGALORE, 15TH APRIL 1901.

ORDER THEREON—Insurance being compulsory in the case of the majority of persons newly entering Government service, they are at present subjected to two separate Medical Examinations. The tests required in the two cases being not quite the same, it was laid down by Government in Proceedings No. 10165-7—K 1322-92, dated the 28th December 1892, that ineligibility for insurance should not be construed as ineligibility for public service also. When a person is passed as fit for insurance according to a standard presumably higher than that required for admission to the ordinary public service, it is unnecessary to examine him separately for the latter purpose.

Government are therefore pleased to direct that in future all candidates accepted for employment in the public service in posts in which insurance is compulsory shall at once be examined for the latter purpose. If they are passed for it, they should be accepted as eligible for entering the service. If the Medical Officer, however, pronounces the candidate an unfit subject for insurance, the latter shall be required to furnish before entry into service the certificate of physical fitness in the form ordinarily in use.

Government Notification Nos. 6968—Ex. 342 and 6969—Ex. 343, dated the 7th March 1901, *re* the sale of Arrack Vend Farms and of Separate Arrack Shops for the year 1901-1902.

READ—

Letter No. 5349—273, dated 10th April 1901, from the Excise Commissioner in Mysore, bringing to notice, for such orders as Government may deem fit to make, certain additional facts in connection with the proposed alteration of the *fixed* retail rate to a *minimum* retail rate.

No. 8286-95—Ex. 400, DATED BANGALORE, 14TH APRIL 1901.

ORDER THEREON—Upon a careful reconsideration of the question, Government have arrived at the conclusion that it is at present inexpedient to apply the alteration referred to above, to any of the vend farms in the State, or to any of the separate shops except those in the Kolar Gold Fields where in practice a minimum rate has unauthorizedly been reported to have prevailed for some time past.

In the first of the Notifications read above, the words "not less than the prescribed minimum rate of" in clause (4) (*a*) of para 7, will be omitted, while the following shall be substituted for the last sentence of clause (3) of para 7 of the second Notification :—

"The arrack shall be sold to the public by the licensee at the *fixed rate* of Rs. 6-6-0 per gallon of 20° under proof, (*i. e.*, at 2 annas per dram which is equal to 1/51st part of a gallon) except at the shops in the Kolar Gold Fields where it shall be sold at *not less than the minimum rate* of Rs. 6-6-0 per gallon of 20° under proof (*i. e.*, at 2 annas per dram which is equal to 1/51st part of a gallon)."

2. In thus directing the application of the new rule to the Kolar Gold Fields, Government have in view the special circumstances of the Fields, and the giving of legal sanction to a practice which has hitherto lacked such sanction, and they further expect that the altered measure will have a beneficial effect on the realizations from shop rentals. Care should be taken to prevent smuggling and other malpractices. The vendors at the Gold Fields should be asked to keep correct accounts of the prices charged by them, so that accurate information might be readily available to Government when required.

3. The reversion to the existing rate should be duly notified to all bidders at the approaching sales at all places other than the Kolar Gold Fields, and a record of this having been done should be maintained under the signatures of the people concerned.

*Appeal No. 6 of 1899-1900.*

| Appellant | *Versus* | Respondent |
|---|---|---|
| Basappagauda (Original Plaintiff). | | Fakiranna (Original Defendant). |

*Decision.*

This is a claim to the pateli office of Kappanahalli village in the Shikarpur taluk. The facts of the case are briefly these:—

One Basalingaiya, a descendant of the original hakdar, was the holder of the pateli office prior to 1868. He was convicted under Section 189 of the Indian Penal Code and dismissed the service in 1867. The plaintiff's brother Chikviriah then succeeded to the office. This Chikviriah also was convicted of a criminal offence and dismissed in 1868. Thereupon Bylanna, the father of the defendant, who was quite unconnected with the family of the first holder, was nominated patel; but subsequently as per Order No. 1743—54, dated 1st July 1869, of the Chief Commissioner that the officiator should, if practicable be a collateral relative of Basalingaiya, inquiries were instituted, and it was reported that there was no such qualified collateral relative. Thereupon the Chief Commissioner finally confirmed the nomination of Bylanna in his General No. 3066—Rev. 77, dated 10th September 1869. Bylanna continued to be patel till 1893 when he was dismissed in connection with some malversation, and his son, the defendant, was appointed to the office on the 19th July 1893.

2. The plaintiff filed a suit in 1898 in the Court of the 2nd General Assistant Commissioner, Shimoga, claiming the pateli office in question for himself and alleging that he was the sole surviving descendant of the original holder, that at the time when it was reported that there were no qualified collateral relatives of Basalingaiya, he was a lad of fourteen, that the principle laid down in Government Proceedings No. 927-34—17, dated 9th May 1881, *viz.*, that in nominating a successor to a dismissed shanbhog or other official holding a hereditary office, the proper course to pursue in the event of no divided members with totally separate interests being available, was to appoint to the office, a stranger for a limited period, say 10 or 20 years, with the reversion of the office at the end of that term to the heirs of the dismissed official, was not applied to his case; that the cause of action arose on the 19th July 1893, when the defendant was appointed to succeed his father, &c. The 2nd General Assistant Commissioner dismissed the suit with costs on the grounds that it was time-barred as the plaintiff had failed to establish his claim within three years after he reached his majority *i, e*, before the year 1880, and that the Government Order of 9th May 1881 could not apply to an appointment made so long ago as 1869, especially when Bylanna's appointment was not made for any limited period as contemplated in that order. On appeal, the Deputy Commissioner confirmed the decree of the 2nd General Assistant Commissioner. Hence this second appeal to Government.

3. The findings of fact as well as of law adopted by the lower Courts are quite sound and cannot be impeached. The Order of 1881 cannot affect retrospectively an arrangement effected in 1838 and 1869 and the absolute and unconditional appointment thus made must be deemed hereditary in its nature. Then again there is no doubt whatever that the possession of which the plaintiff's predecessor was deprived, became adverse in the hands of the defendant's predecessor, and the time began to run from that date. The plaintiff's minority does not extend the period for more than three years after he arrived at his majority and the suit was filed several years after he became a major. The suit has therefore been rightly dismissed and this second appeal must fail. It is accordingly dismissed.

Copy of the above is forwarded to the Deputy Commissioner, Shimoga district, with records submitted with his No. 556—446, dated 23 December 1899.

*Decision.*

The facts of the case are briefly as follows:—

One Kariramegauda, hakdar patel of Dasappanhalli village in the Gubbi taluk, died on the 30th August 1897. Pending enquiry into the claims of the hakdars, Gullegauda, brother of the deceased, was, on 27th February 1898, appointed to do the duties. Subsequently it was ascertained that the deceased patel Kariramegauda had left no male issue. On 22nd January 1900, the Deputy Commissioner ordered the registry of the office in the name of Chittamma, the widow of the deceased Kariramegauda, and allowed her to nominate one Kambada Rangegauda as her gumasta in place of Gullegauda who, it had been found, frequently absented himself from the village and was otherwise inattentive to his work. Gullegauda appealed to Government against this order alleging that Kariramegauda was his undivided brother and that the office should be registered in his name; and the Government in Official Memo No. Pet.—1099, dated 8th May 1900, requested the Deputy Commissioner to ascertain if the deceased registerdar was divided from the appellant. The Deputy Commissioner in submitting the papers relating to the above inquiry, is of opinion that the inquiry made showed that Gullegauda and the deceased were divided brothers.

2. The respondent Chittamma having died during the pendency of these proceedings, it has become unnecessary to decide the question whether, her objection notwithstanding, Gullegauda was not entitled to succeed to the office of patel in preference to her immediately after the death of his brother Kariramegauda. There can be no doubt that the office must now be conferred on him and registered in his name. The evidence in proof of division is as inconclusive as it is immaterial. Gullegauda must of course reside permanently in the village and carry on the duties of the office of patel to the satisfaction of the local authorities. With these observations, Government direct that this appeal be allowed and that Gullegauda be appointed patel.

This is a claim to the shanbhogi office of Ketaganahalli and 15 other villages in the Bowringpet taluk.

The facts of the case are briefly as follows:—

In their Proceedings No. 266 (Camp), dated Mysore, 4th March 1885, Government ordered the registry of the respondent Subbamma's name to the shanbhogi office of the abovementioned villages, and allowed her to nominate a gumasta. One Nadampalli Narnappa, who was unconnected with the family of Subbamma's husband Chayappa and was of a different sect, was accordingly appointed her gumasta. In 1895, on examining the Vasul Baki accounts of the taluk, it was discovered that there was an outstanding balance of Rs. 286-0-7 against these villages from the year Dhatu (1876-77), and in consideration of Narnappa paying this amount, Subbamma at first agreed to transfer the marginally noted nine villages to his name, keeping the remaining seven villages for herself and also deposed to that effect on 5th January 1896 before the Amildar of Bowringpet. But subsequently on 11th March 1896 she personally presented a petition to the Deputy Commissioner (Mr. Madiah) praying that all the 16 villages might be registered in the name of Narnappa. Mr. Madiah granted this request. Narnappa having died on 25th June 1898, his widow Adilakshmamma, the 1st appellant before Government, claimed to succeed to the shanbhogi office. But Subbamma came forward and contended that Mr. Madiah's order of March 1896, was procured by fraud, and that Narnappa had not fulfilled some of the conditions on which the transfer of the office had been agreed to between them. Mr. Sparkes, the Deputy Commissioner, who enquired into the case passed an order on 28th November 1899, in favor of Subbamma, the respondent, and held that the registry ordered on 11th March 1896 was valid only during the life-time of Narnappa, and that on his death, the office reverted to the previous registerdar. Adilakshmamma, the widow of Narnappa, and her widowed daughter-in-law (1st and 2nd appellants before Government, respectively), have now appealed to Government against this order.

*Decision*:

The parties were heard. They wish to compromise the case and propose to divide the shanbhogi hak according to the deposition given by Subbamma and Narnappa before the Amildar of Bowringpet on 5th January 1896. They have filed a statement to the above effect before the Council. This appears to be an equitable arrangement under the circumstances and is sanctioned.

# FOREST

*Proceedings of the Government of Mysore,*

READ THE FOLLOWING—

*Letter No. 2540—207, dated the 1st February 1901, from the Conservator of Forests in Mysore.*

I have the honor to submit, for the information of Government, the following report on the results of the auction sales of sandalwood held at the various kotis during November and December last. The sales began on this occasion in the Mysore district, closing in Shimoga, and took place on the dates noted below :—

| | | |
|---|---|---|
| (1) | Hunsur ... ... ... | ... 22nd November. |
| (2) | Seringapatam ... ... ... | ... 26th „ |
| (3) | Bangalore ... ... ... | ... 30th „ |
| (4) | Hassan ... ... ... | ... 4th December. |
| (5) | Chikmagalur ... ... ... | ... 8th „ |
| (6) | Shimoga ... ... ... | ... 12th „ |
| (7) | Sagar ... ... ... | ... 17th „ |
| (8) | Tirthahalli ... ... ... | ... 21st „ |

2. Conformably to instructions received from Government, sandalwood belonging to the six classes marginally noted were withheld from sale to the public. As reported in this office letter No. 2272—207, dated 4th ultimo, the total quantity of wood so reserved was as follows :—

Cheria. Milwa chilta.
Ain chilta. Basola bulooi.
Hatri chilta. Sawdust.

| | Tons | cwts. | lbs. |
|---|---|---|---|
| Government wood ... ... ... | ... 507 | 10 | 51 |
| Inam wood ... ... ... | ... 0 | 10 | 75 |
| Total | ... 508 | 1 | 14 |

Sales to the public were, therefore, confined to the first twelve classes, including all the most valuable wood; and average sale rates secured are comparable only with corresponding rates obtained at previous auction sales for the same classes.

3. At Hunsur, the quantity exposed for sale was 303 tons, 15 cwts. and 56 lbs., and of this 240 and odd tons were sold for Rs 1,14,095-4-3. The average price was Rs. 475 as against Rs. 551 obtained (for the twelve classes) in 1899. The low average is due solely to the fact that none of the roots could be sold consequent on the very low bids made. At the Seringapatam sale all the roots were also withheld for the same reason. At this koti in all 193 and odd tons were put up for auction; but only 145 tons were sold for Rs. 69,323-4-3. The average rate was Rs. 478 per ton as against Rs. 520 in the previous year. Both at Hunsur and at Seringapatam the attendance of buyers was small and competition was chiefly between European firms.

4. The quantity offered for sale at Bangalore was—

| | Tons | cwts. | lbs. |
|---|---|---|---|
| Bangalore wood ... ... ... | ... 62 | 8 | 41 |
| Tumkur „ ... ... ... | ... 25 | 7 | 21 |
| Kolar „ ... ... ... | ... 1 | 18 | 97 |
| Total | .. 89 | 14 | 47 |

Of this, about 70 tons were disposed of for Rs. 33,235-7-0, or at Rs. 479 per ton, as compared with Rs. 537 in the preceding year. Here also none of the roots could be sold owing to the low prices offered. The District Forest Officer reports that the attendance was poor and the bidding comparatively dull, especially for roots.

5. At Hassan, again, none of the roots could be disposed of, but the sale appears to have been well-managed and much better prices were realised for lots disposed of (*vide* appended schedule of rates). Out of some 190 tons exposed for sale, 132¼ tons were sold, realising Rs. 65,791-9-10, at an average rate of Rs. 496. The average for 1899 (Rs. 538) would have been exceeded had it been possible to sell the roots at fair rates.

6. At the Chikmagalur sale, about 151 tons in all were prepared and offered for sale and were sold for Rs. 79,284-9-3. The average rate was Rs. 526 per ton, as against

Rs. 495 in the preceding year. In this case all the roots were disposed of. The District Forest Officer reported that competition was keen on the whole; but it is remarkable that much better rates were secured for certain classes at the sale immediately following. Along with the Government wood, 3 tons, 16 cwts. and 63 lbs. of Kalasa temple inam wood were sold for Rs. 1,990-6-11.

7. The wood offered for sale at the Shimoga koti comprised the following :—

| | Tons | cwts. |
|---|---|---|
| Shimoga district wood ... ... ... ... | 292 | 4 |
| Kadur „ „ ... ... ... ... | 16 | 1 |
| Total .. | 308 | 5 |

The sale was very successful. All the wood with the exception of some 11 tons of 3rd class roots, was disposed of at good figures. The total receipts were Rs. 1,72,100-12-3, and the average rate obtained was Rs. 580 as compared with Rs. 476 in 1899. At the Sagar koti, 202¾ tons were offered for sale, of which nearly 179½ tons were disposed of for Rs. 98,189-3-3. The unsold balance consisted of "panjam" and 2nd and 3rd class roots. The average rate secured per ton was Rs. 547 as against Rs. 511 in the previous year. Better results could probably have been obtained had the District Forest Officer thwarted combination among buyers to force down prices below those secured at Shimoga. The notable decline in rates for certain classes at this koti has been insufficiently commented upon by the District Forest Officer. At the Tirthahalli koti the total quantity offered for sale, including 12 and odd tons of Kadur wood, was 122 tons. The entire quantity was disposed of for Rs. 68,774, or at an all-round rate per ton of Rs. 563 against an average of Rs. 488 secured in 1899. For the entire district, including 27¾ tons of wood collected in Kadur, 598⅛ tons in all were disposed of for Rs. 3,39,064 at an average rate of Rs. 567

8. From the appended statement A it will be observed that, considering the eight kotis collectively, 1,560 tons, 12 cwts. and 44 lbs. of wood were offered for sale. Of this, 1,336 tons, 11 cwts. and 17 lbs. were sold for Rs. 7,00,794-1-10. Thus the general average rate secured was Rs. 524 against Rs. 515 for the twelve classes of wood in the previous year. The quantity of wood offered for sale, but not disposed of was 224 tons, 1 cwt. and 27 lbs.

9. The unsold lots consist almost exclusively of roots for which there is a great and growing demand. It became clear to me from experience derived from sales in previous years that Government was not obtaining, in respect of certain classes, the real value of the produce sold. It will probably not be questioned that, though we should not abuse the monopoly which we practically enjoy, yet Government is fully entitled to reap all legitimate advantage from that monopoly. The demand for sandalwood oil is constantly increasing; and only the other day one of the largest European houses concerned in the trade opened an extensive distillery. But prices, if we except those of 1899, have if anything been on the downward grade in recent years. Buyers appear to consider that they are unfairly dealt with if reserve prices are fixed somewhat in excess of those secured in previous years. There can be no longer any doubt that combination of some sort is customarily resorted to in order to keep prices low. Pre-arrangement among purchasers was strongly suspected in 1899 and in previous years. The District Forest Officer, Hassan, reporting on the recent auction sale, remarked that only three persons offered bids for certain classes, and "evidently there was an understanding among three of the bidders not to go beyond certain rates for each class of wood." Again the District Forest Officer, Shimoga, stated that combination among bidders accounts for the fall in rates at Sagar, as compared with the rates which had just previously been secured at Shimoga. A firm front must be presented to combination of this kind if Government is to obtain their legitimate sandalwood revenue. It was for this reason that all maxima bids for roots at the Hunsur, Seringapatam, Bangalore and Hassan kotis, were refused. The highest bids for roots at Hunsur and Seringapatam ranged from Rs. 500 to Rs. 566 per ton: all were declined. The best justification for this action lies in the fact that, as soon as the merchants realised that the Department could not be constrained to sell roots at low prices, they offered much more than the reserved (confidential) prices. Thus, as will be seen from the appended statistics (*vide* Appendix D), in the Shimoga district, 3rd class roots were sold for as much as Rs. 671 per ton or Rs. 171 per ton in excess of the highest offer made and refused at Hunsur. Similarly, first class roots at the close of the sales in the Shimoga district realised as much as Rs. 690 per ton, as compared with a maximum of Rs. 550 offered and declined at Hunsur. The withholding of much of the stock of roots is expected to have a beneficial effect on future sales. The roots will probably be disposed of by private treaty before the close of the financial year at good prices; and will certainly be sold eventually at prices much in excess of those offered at auction.

10. The following figures compare the general average rates secured for each class at the sales with those of 1899 :—

| Description of wood. | Average rate for 1900. | Average rate for 1899. |
|---|---|---|
| | Rs. | Rs. |
| Vilayat Budh ... ... ... ... ... | 513 | 544 |
| China Budh ... ... ... ... ... | 562 | 531 |
| Panjam ... ... ... ... ... | 577 | 541 |
| Ghotla ... ... ... ... ... | 533 | 495 |
| Ghat Badala ... ... ... ... ... | 500 | 484 |
| Bagaradad ... ... ... ... ... | 509 | 464 |
| Roots (first class) ... ... ... ... ... | 655 | 613 |
| Do (second „ ) ... ... ... ... ... | 631 | 619 |
| Do (third „ ) ... ... ... ... ... | 614 | 607 |
| Jujpokal (first „ ) ... ... ... ... ... | 491 | 478 |
| Do (second „ ) ... ... ... ... ... | 466 | 455 |
| Ain Bagar ... ... ... ... ... | 453 | 424 |

It will thus be seen that with the exception of "vilayat budh," better rates were secured in every case in 1900.

11. Upon the whole, the sales of 1900 may, it is thought, be regarded as satisfactory. As already noted, the general average rate per ton was raised from Rs. 515 to Rs. 524. The year's budget provided for a sale of about 2,000 tons and an estimated revenue of Rs. 8,11,000. The actual receipts exceeded seven lakhs. The value of the wood (224 tons of roots, &c.) exposed for sale but not disposed of, may be estimated at Rs. 1,34,000 at least. There is reason to believe that the unsold balance will be disposed of shortly, in which case the budget estimate will be exceeded. If, in addition, account be taken of the value of the stock of chips, &c., (507½ tons) not offered for sale under Government orders, but which will, it is hoped, be paid for within the year, the results will be seen to be very favorable.

12. The sales of 1900 confirm what was suggested last year, namely, that, in such a business as this, results will be better if the sales are treated as a single commercial operation and are controlled at each koti consecutively by an officer of experience and business capacity specially deputed for the purpose.

No. 686—Ft. F. 31-95, dated Bangalore, 23rd April 1901.

Order thereon—Recorded.

2. The total quantity of sandalwood sold was 1,336 tons, 11 cwts. and 17 lbs., yielding a revenue of Rs. 7,00,794-1-10 at an all-round average rate of Rs. 524 per ton. All wood of the inferior classes, about 508 tons, valued at Rs. 90,000, was reserved for sale by private treaty. Of the wood exposed for sale, 224 tons, mostly of roots valued at Rs. 1,34,000, were not disposed of in consequence of the low bids made at auction.

3. The Government think that it is quite right to refuse low bids and for this reason to allow stocks to remain unsold temporarily; and they approve of the policy of treating all the sales as one connected undertaking.

4. The results of the sales are on the whole satisfactory.

Para 7 of Government Proceedings No. 1659-60—Ft. F. 38-95, dated the 31st August 1898, directing that inquiries be instituted regarding the missing settlement records of the Maddagiri State Forest in the Tumkur district.

(2) Letter No. 3170—17, dated the 29th March 1901, from the Conservator of Forests in Mysore, submitting a report from the District Forest Officer, Tumkur district, detailing the circumstances under which no regular record of the original settlement of the Maddagiri Forest is forthcoming.

No. 687-95—Ft. F. 38-95, dated Bangalore, 23rd April 1901.

Order thereon—Failure to prepare a complete record of forest settlement proceedings, or the loss of such a record after preparation is a serious matter, and the importance of carefully preserving such records cannot be too strongly insisted on.

2. Government accordingly direct that the record pertaining to every State Forest should be now examined, arranged and deposited in the District Forest office under proper safeguards for its security, the District Forest Officer being, under the Deputy Commissioner's supervision, held personally responsible that this direction receives immediate attention.

3. In the case under notice, the Government lay special stress upon the inordinate and apparently inexcusable delay which occurred in the submission of the District Forest Officer's report, and impress upon Deputy Commissioners and their Forest Assistants the importance of prompt attention being paid to requisitions for reports or information either from the Conservator of Forests or from Government.

Note, dated 19th April 1901, by the Secretary to Government in the Forest Department suggesting that, with a view to more closely associate Revenue and Forest Officers in the various districts, certain changes in the conduct of Forest business might with advantage be ordered.

No. 696-704—FT. F. 29-1900, DATED BANGALORE, 24TH APRIL 1901.

ORDER THEREON—Government observe that the District Forest Officer is the Assistant of the Deputy Commissioner in respect of Forest matters, and desire that every possible effect should be given to the application in practice of this principle upon which they lay particular stress. In pursuance of this general principle, and in view of the fact that the District Forest office is merely a branch of the Deputy Commissioner's office, over which the latter officer can exercise full control by general or special orders, the Forest Secretary proposes that all Forest business at District head-quarters should be centralised in the District Forest office, where also all Forest records and papers should be recorded and preserved.

2. Before passing final orders on these proposals, Government will await reports from Deputy Commissioners on the following questions:—

(*a*) What Forest business is conducted, and what kinds of Forest records or correspondence are kept at District head-quarters apart from or outside the District Forest office?

(*b*) Whether, and if so what, practical objections exist to all Forest records and papers being preserved in the District Forest office where Forest business of every kind, including the administration of the District Forests, would be centralised?

(*c*) In connection with the general principle enunciated in the preceding paragraph, would it conduce to more satisfactory administration were, in every case, communications relating to Forest matters to be addressed to or to be issued from "the Deputy Commissioner, Forest Branch?"
